

Clamping Elements — continued

Smooth Spring Plunger

- Ideal for location securing or positioning in machine and fixture design
- Suitable for 'lifting off' and applying pressure points
- Indexing and positive stopping device applications

These are usually inserted into a 'press fit' hole and a hole tolerance of J6 is recommended. Always carry out testing as hole tolerance depends on material and application.

Material: Body stainless steel, ball stainless steel (hardened)

Wire Rope

Wire Rope – Steel Galvanised

- 6x7 Construction with fibre core
- Manufactured in accordance with **BS302 1987**, Tensile grade **1170N/MM2**
- Lacking flexibility ideal for haulage guy ropes, strapping rigging etc.

∅	Minimum Breaking Load (tonnes)	Approx Weight kg/100m	Order Code
