Tubular Framework Systems

'Termotex' Tubing

Standard lengths of square-section aluminium tube, strong joint links and a range of accessories are available with which to build rigid cuboid frames, for specific requirements. Its versatility makes it ideal for shelving, display stands, tables, trolleys and partitioning.

The aluminium tube is also available in flanged sections (see diagram), to support standard 19mm work surfaces. Due to the numerous permutations of size and finish, work surface panels are not supplied.

The system is quick and easy to assemble, using only a soft face hammer.
