

Hole Saws

Hole Saws

- VIP tooling for smoother sawing and less vibration
- Bi-metal steel with teeth of hardened HSS
- Large tooth gullets and tooth set make swarf removal more efficient
- Knockout holes allow easy removal of cores

Arbors

- All arbors are hardened for maximum strength
- Large arbors (from 32-210mm) have 'drive plus' to transfer large cutting force from the holesaw to the power unit
- All arbors are supplied with pilot drills

Tungsten Carbide Grit Edge

- Designed for use in fibre glass, cast iron, tiles, plywood, slate, hardboard, sheet steel, plastic laminates, glass, marble, plaster brick, chipboard, cement and difficult non-chip forming materials
- The fine grit particles are extremely durable and give good services in many applications
- The holes produced usually require no additional finishing
- For arbors see the Disston range of Veri Pitch hole saws
- For masonry etc, a tungsten carbide tipped pilot drill must be used
