

- Cuts 40% faster than conventional bi-metal holesaws
- Lower feed pressure – ideal for higher rpm for today's portable drills
- Cleans cut faster, staying sharper longer
- Thicker steel back – prevents screw stripping
- Cuts aluminium, stainless steel, tool steel, cast iron, brass, wood and plastic
- 28.5mm depth of cut
- Arbors interchangeable with all major holesaw brands
- Arbors complete with 6mm split point HSS pilot drill which adjusts to 3 lengths
- D5204 is a quick change model which allows instant change of holesaws without removing arbor from chuck
- Arbors are fully heat treated for maximum wear resistance
- Arbor adaptor is used with the 3 conventional arbors to allow them to be used with larger holesaws
- The following materials should be cut without lubrication:- wood, cast iron, plywood, plastic and chipboard
- Available in handy kit form

## Ceiling Hole Cutter

Price Reduced

Hole cutting = 80 to 160mm  
Overall tool diameter = 217

- Capable of cutting plywood, plaster board or acrylic sheet
- Thickness of 23mm, or 46mm if other side is accessible, is obtainable
- For sheet metal it can cut 1mm aluminium or brass
- Plastic bowl enables holes to be cut without dust sheets
- The bowl can be removed for cleaning without having to change the cutter setting
- Supplied in a carrying case with full instructions
