

- Compact hand held cable cutter
- Durable chrome molybdenum steel blade giving high tolerances
- Profiled blade ensures easy cut up to 32mm diameter
- Suitable to cut hard drawn copper and aluminium cable
- Quick blade release for added safety
- Handle locking mechanism
- Comfort, impact resistant handle

Note: Comfort grips are not insulated

Wire Rope Cutter

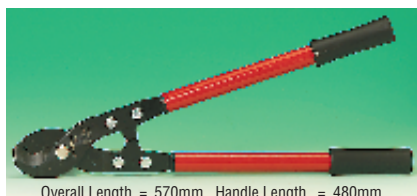

- Professional tool which will cut wire rope, fencing wire, barbed wire, Bowden cable etc
- Angled blades for clean cut.
- Comfortable grips

Cutting Capacity (mm) ∅
 Stranded Mild Steel 6mm High Tensile Steel 4mm
 Solid Spring Steel 2mm Mild Steel 4mm

Wire Rope and Cable Armour Cutter

Overall length = 195

- Special cutting action for cutting wire strand cable armour, electric cable and metal wires and rods
- Distortion free cut
- Spring loaded handle

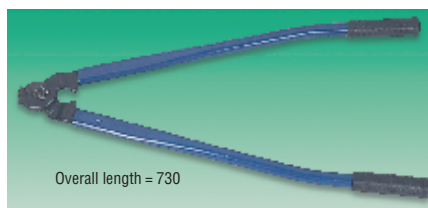

Cutting Capacities

Mild steel strand 85 ton/inch ²	6.5mm	Copper and aluminium rod	5.0mm
Unarmoured electric cable	6.5mm	Steel rod, 42 ton/inch ²	4.0mm
High tensile steel rope, 115 ton/inch ²	5.0mm	Spring steel wire, 115 ton/inch ²	4.0mm
Steel wire, 21 ton/inch ²	5.0mm

1000V Insulated Tools

A range of insulated tools conforming to BS60900 for 1000V live line working. The insulation used is a tough moulded Orange Nylon 11 which has a higher mechanical strength and resistance to wear than the soft dipped PVC types. The Nylon 11 tools are less susceptible to accidental nicks and damage which can easily render other tools unsafe for use.

Sidecutters

BS60900

The base tools are manufactured by Wilkinson or Elliot Lucas.

Cutting capacity:
 107-994 16mm² stranded copper/aluminium
 202-400 12mm² stranded copper/aluminium

Overall lengths: 107-994 = 190, 202-400 = 160
