

Ergonomic Screwdrivers

Screwdriver range that are easy to use and comfortable to hold that have the effect of reducing muscle tension and the risk of accidents and injuries. It may not revolutionize the way you work but it can make your most valuable tool (your hand) last your whole life long

- Three-component handles: Combines strong core with good grip. Soft, high-friction material with ridged surface for comfortable grip and maximum friction even when the hand is oily
- Rounded shape thus no pressure points no matter how the screwdriver is held or used
- Easy to choose the right tip with colour-coded handle and symbol on the end. Colour and symbol do not wear out
- Optimal length on the handle neck. Fingers are always correctly positioned for quick turning and precision control
- Hexagonal nut, from 8mm blade diameter, so a wrench can be used for extra torque. Flat face so that the screwdriver will not roll
