BNC Connectors and Terminators

'T' Adaptor and Insulating Cover

Cover H = 19.5, W = 80.5, D = 32.2

T-adaptor

- The T-adaptor has a nickel plated body and gold plated centre contacts
- Impedance is 50Ω
- A single piece, snap-together black plastic cover protects against accidental grounding or dis-connection.

Mftrs. List No.   BNC-TB = 152-083,   VBA109 = 251-197

Thin Ethernet Terminator (1 Watt)

tyco / Electronics

Resistor plug   Resistor plug with earth

L = 25.9, Dia = 14.3

- Resistor plugs for terminating thin ethernet networks
- Bright nickel plated bodies with gold plated contacts
- Impedance is 50Ω.

Mftrs. List No.   B35X06J501X99 = 251-185,   B35Z98J501X99 = 251-173

Thin Ethernet® Crimp Plugs, 50Ω

tyco / Electronics

Standard   Insulated

- Bright nickel plated body, and gold plated centre contact
- The insulated plug has a grey plastic cover, and matching strain relief sleeve

Suitable cable   Belden 9907, UR76; RG58CU

Mftrs. List No.   B35A04JB10599 = 152-313,
B35A41JB10X99 = 251-136

Straight **251-148**						

Ethernet Cable (Coax)

Thin Ethernet Cable Assemblies

Videk

- RG58 50Ω Cable
- Foil and braid double shielded
- Complete with moulded strain relief boots
- Fitted with BNC male connector at both ends
- Fully tested

Safetap System

Safertap®
Thin Ethernet Access Port

VITELEC

- Make-before-break switching preserves network integrity.
- Supports commonly used BNC access leads.
- Precision engineered with gold plated contacts.
- Tamper-proof design.
- Housed in a metal enclosure which provides effective shielding from EMI/RFI interference
- Available in two versions

Surface Mount   This unit is housed in a low profile Thorsman's data box with a fixing plate compatible with European standard conduit boxes. Adequate space is left in the databox for installation wiring; internal connection is via two BNC connectors and straight BNC plugs can be used whilst keeping within IEEE 802-3 bend radius limits.

Flush Mount   Mounted behind a white moulded plastic faceplate, this unit is suitable for flush mounting using a suitable wall box, (minimum depth 18mm).

FCC 68 Style Connectors and Tooling

IDC Plugs

4/4, 6/4, 6/6 and 8/8 Way

▲Denotes pin 1

4 and 6 way, short body   8 way, long body

- IDC plugs commonly used in both telecommunications and computer equipment.
- Two styles – handset and standard line plugs with a wide contact area for ease of crimping
- The handset plugs are mostly used to interconnect a telephone handset to the base unit
- The 8 way 8 contact version is also available with a polarising side key and is mainly used in computer applications
