Storm Graphic Series+ Configurable Keypads

Keypad legends can be custom configured without the need to dismantle the keypad. Transparent polymer legend tiles can be selected from an extensive library of standard characters or symbols and located in the keypad by a unique snap-on keypad cap. Customised keypad graphics can be created using laser printed acetate film or screen printed polymer film. Coloured keytops are achieved by inserting a second, coloured tile under the polymer legend tile. The impact resistant keypad cap provides a permanent, tamper resistant lens protecting the encapsulated legend from war, physical damage and water ingress.

- High impact polymer ● Sealed to IP54
- Quick and easy to install ● Top surface or under panel mounting
- Interchangeable with Storm K Series keypads
- Ideal for use in industrial, commercial public and point of sale applications
- Six legend tile sets available for information see legend tile character library below

Contacts Gold over Nickel
Contact rating 24V dc, 50mA
Operating temperature -10°C (dry) to +85°C

Breakdown voltage 500V ac
Insulation resistance 50MΩ
