

Machine Tools - Saws — continued

Reciprocating Bi-Metal Blades

- For professional use on a wide range of materials such as metal, plastics, wood laminates and tiles
- Available in four different blade shapes; standard, slope, slope V6 and scroll
- Standard shape for cutting with straight cuts
- Slope shape for all-round cutting with both straight and curving cuts

- Slope V6 blade suitable for cutting plasterboard
- Scroll for sawing with tight radii
- Can be used on all makes of reciprocating saw machines ● 5 blades per pack

Toolholding - Chucks

Pin Vices

ECLIPSE

L = 75 (146-443), 90 (146-444) Dia = 9 (146-443), 11 (146-444)

- Pin vices enabling small twist drills to be hand held
- Knurled handles to prevent slippage
- Steel construction with oil blackened finish
- Ideal for field and laboratory use for opening and clearing holes in PCBs

Pin Chuck

ECLIPSE

L = 58 (overall), 25 (shank).  
Dia. = 13 (body) .635 (shank)

- Pin chuck designed to adapt a larger drill chuck to hold small twist drills in the range 0 to 2.5mm Ø
- Steel construction with oil blackened finish
- Supplied with interchangeable collets
- Incorporates a 2.5mm diameter 'tommy bar' hole

Replacement Chucks and Keys

5" Hex Screwdriver Adaptor

SDS-Plus 6" 20 UNF Adaptor

- A quality range of chucks of different types and grades suitable for most applications
- Screwdriver adaptor for electric screwdrivers: Simple a 6.5mm capacity 3-jaw chuck mounted on a 1/4"-hex spindle to allow electric screwdrivers with a bit reception only, to be used as a small drilling machine
- Standard replacement chucks: Available with 3/8" 24 female mount in two grades. 'Multi-craft' chucks are light duty with hardened jaws and gear teeth and knurled pressed steel outer sleeves 'super-craft' chucks are medium duty with hardened jaws and gear teeth, but with machined steel sleeves
- Industrial chucks: these are quality chucks in which all working components are fully hardened and ground
- Keys: supplied with the chucks that require them, also available separately
- Note: None of the above chucks should be used on a pneumatic hammer drill whilst in the hammer mode
