

STANLEY

THE SCREWDRIVER REDEFINED

Provides Optimum
Torque, Performance
& Comfort under all
conditions.

266 577 to 266 802,
267-028 to 267-168,
MAGNUM

■ Chrome vanadium hardened and tempered blades – **Maximum strength and long life**

■ Innovative "Polinox" blade treatment – **Flake-free finish**

■ Lacquered blade – **Resists corrosion**

■ Winged bar set deep into handle – **Solid permanent joint**

■ Moulded polypropylene body – **Virtually unbreakable**

■ Integrally moulded thermo-plastic elastomer inserts – **Improved grip and comfort in use even in 'wet' conditions**

Innovative manufacturing technology pioneered by Stanley enables molecular bonding of the hard and soft materials in this unique handle, providing strength, durability and comfort to produce high torque performance.

■ Wide range of slotted cross-point and torx drivers available – **Covers virtually every requirement**

■ Moulding eliminates usual seam line over the end of handle – **Increased comfort**

**SLOTTED
PHILLIPS
TORX**
