

**Auto Iris Vari-Focal Zoom lenses
(Indoor & External)**

Designed for indoor and outdoor application where lighting levels vary. This range of auto iris vari-focal zoom lenses are the ideal solution. The auto iris lens will automatically adjust to the changing light levels. The vari-focal zoom lens allows you to manually adjust the focal length so you can adjust the image to your exact requirements. The Iris lead is pre-plugged & suitable for 1/3" cameras with Direct Drive auto iris and CS mount fittings.
