

Flexible 2 Core

Semiconductive Plastic Screen

Clear and Yellow polyethylene insulated 30/0.12mm (0.35mm²) tinned copper conductors laid with 30/0.12mm tinned copper drain wire in a semiconductive plastic bedding giving a high level of screening with no degradation due to cable/screen movement. Sheathed overall in Type 8 Arctic grade PVC for high flexibility.

Nominal outside diameter 6.6

Capacitance 91pF/m, core to core, pF/m, core to screen
