

## SAFE USE INSTRUCTIONS ALUMINUM CAPACITORS wrt DEHP

### USE IN PRODUCT

DEHP is used as plasticizer in the PVC insulation sleeve of certain types of Vishay Aluminum Capacitors.

The DEHP concentration in the PVC is about 4-10wt%.

### SAFETY INSTRUCTIONS

Avoid exposure:

- wash your hands after handling the capacitor, i.e. touching the PVC sleeve.
- use gloves in case of frequent contact
- do not swallow
- in case of smoke or fire do not inhale the vapors

In case of accident, e.g. smoke or fire, or if you feel unwell, seek medical advice immediately.
