Product Description

The RF1200 is a single-pole double-throw (SPDT) switch designed for general purpose switching applications which require very low insertion loss and high power handling capability. The RF1200 is ideally suited for battery operated applications requiring high performance switching with very low DC power consumption. The RF1200 features low insertion loss, low control voltage, high linearity, and very good harmonic characteristics. It is fabricated with 0.5µm GaAs pHEMT process, and is packaged in a very compact 2mmx2mm, 6-pin, leadless QFN package.
