T18S – T250XL

Available in a wide range of materials, these cable ties all feature internal serrations allowing for a positive hold onto cable and pipe bundles. The design of the head guarantees a high tensile strength whilst allowing a very low insertion force, this, combined with the bent tail design of many of the ties ensures a simple and quick installation. Whilst easily installed by hand, - manual and pneumatic (for high volume applications) tensioning tools are available to ensure consistency of installation.

For the routing, bundling and securing of cables, pipes and hoses.
