

# ORNS-HGC1M

## Non-Marking Orange Heel Grounder

Our Orange 3-layer sole eliminates scuff marks on ESD floors and shoes. Bright orange rubber makes the grounder easier to see and to confirm that associates are wearing grounders. The three layer, reversible, double life sole is static dissipative. Elastic Velcro provides a secure, comfortable fit. Made in the USA, this quality grounder is tested for electrical performance and is lot numbered. SCC uses time-tested construction techniques including computer controlled stitching, riveting, die cutting, and heat cutting to ensure consistent performance.

### Standards

Meets the requirements of ANSI/ESD S-20.20, EIA 625, MIL-STD-1686, and MIL-HDBK-263.

### Specifications

Resistor: 1 megohm or no resistor  
 Sole: 3-layer, dissipative, orange  
 Ribbon: Gray, Multi-strand, carbon suffused nylon on polyester, sewn in sinusoidal pattern to provide side to side conductivity.  
 Hook and Loop: 3/4", Elastic loop, Black  
 Traceability: Lot Coded  
 Sole Exterior:  $<10^8$  ohms  
 Total Grounder:  $10^7 - 10^8$  ohms

### Part Numbers

ORNS-HGC1M Orange Non-Marking Heel Grounder, 1 meg resistor  
 ORNS-HGC0M Orange Non-Marking Heel Grounder, no resistor

#### How Foot Grounders Work

Foot grounders discharge static from a person to ground by connecting the person to a grounded walking surface. A conductive ribbon placed inside the wearer's shoe or sock makes electrical contact with the skin through perspiration. The ribbon is joined to a resistor which limits current should accidental exposure to electricity occur. The other end of the resistor is joined to a conductive sole. This sole contacts a grounded ESD floor mat or ESD flooring system. Foot grounders must be worn on both feet to maintain ground contact while walking.
