- ✓ Prints 2 lines of text in 3 type sizes
- ✓ 3 styles of printing—Normal, Italic and Outline, as well as Underline and Box
- ✓ Units of measure in inches and millimeters
- ✓ Language selection key: English, French or Spanish
- ✓ Requires 6 "AAA" batteries (not included)

RHINO 1000 Package Includes:

RHINO 1000, one 1/2" white flexible nylon label cassette

HIGH-PERFORMANCE LABELS THAT STICK AND LAST.

Portable label printers are only as good as the labels on which they print. That's why DYMO designed a series of labels for a multitude of applications on a wide variety of surfaces. Designed to work with the DYMO RHINO series of portable label printers, these labels will stick and stay stuck.

PICKING THE RIGHT LABEL FOR YOUR APPLICATION

Flexible Nylon

The principal application for RHINO labels is wire and cable wraps. The flexible nylon labels are made of memory-resistant materials, making them ideal to wrap around curved surfaces – wire and cable – and the adhesive will stick and stay stuck for the lifetime of the cable. Don't try this with ordinary office labels, they'll quickly fall to the floor.

Permanent Polyester

Featuring a "shinier" finish than the Flexible Nylon, the RHINO Permanent Polyester label presents a more sophisticated look and is designed for flat surfaces. Ideal for patch panels, racks, enclosures, factory equipment and much more.

Metallized Permanent Polyester

For an even more polished finish, choose the Metallized Permanent Polyester labels. Fashioned with a unique metallic silver finish, these labels are great for asset tagging, face plates, factory equipment, tool bins, and anywhere you'd use a flat – surface label.

LABELS THAT STICK AND STAY STUCK

Heat Shrink Tubes

Specifically designed for all applications that require heat shrink tubing. Made of industrial grade polyolefin and featuring a 3:1 heat shrink ratio, these new labels offer the convenience of printing directly on the tubing itself – eliminating the need for an extra labeling step.

Vinyl Labels

Colored vinyl labels are a perfect solution for general labeling around a facility or if colored labels are required. Color coding gives a better visual recognition to your identification needs. These labels are ideal for warning and safety messages, patch panels/face plates, cables and wire marking and general labeling where color labels are required. Additionally, the labels can be used outdoors in direct sunlight.

Non Adhesive Tag Labels

The non-adhesive tags are a great solution when an adhesive label is not required. This non-adhesive polypropylene solution which is untearable, offers a flexible way of providing high-quality on-the-spot labeling. You can cut the insert to the size you need that fits with any panel or for any labelholder of your choice. The primary applications for this label are patch panels and outlets.

LABEL SELECTION CHART

Part #	Description	Length	5000	3000	1000
18488	White Flexible Nylon Tape 1/2" (12mm)	11.5'	✓	✓	✓

DYMO Embossing Labelmaker

Item No.
1011-05

INNOVATION THAT BEGAN OVER 40 YEARS AGO AND CONTINUES TODAY.

With the introduction of DYMO embossing labelmakers in the 1950s, we practically invented the labeling category. Ever since, DYMO embossing tools have made it easy for people to identify and organize everything in their lives – at home, at school and at work.

FEATURES:

Metal Tape Embosser - Sku #1011-05

Industrial and factory tasks are made easy with this tough cast-aluminum labeler. Features a front scissor cutoff and a built-in hole punching device that creates a hole for hanging and tacking. Imprints 1/2" (12mm) wide metal and vinyl tapes that withstand weather, temperature and corrosion.

- ✓ Built-in hole puncher
- ✓ Front Scissor Cutoff
