

# Digital Recording & Remote CCTV System Software

XVIS1ESW

The X-Vision software and CCTV card will turn your windows PC into a CCTV control center with features that normal CCTV systems will find hard to match.

Digital recording of camera on to hard drive

Digital watermark for authenticity

Remote viewing and setup via a Windows PC from anywhere in the world, connected via the internet, LAN or via modem/ISDN/ADSL, play back incidents using ADSL/LAN

Auto/Alert/Record function, automatically identifies movement on cameras and then records only those images and/or contacts your telephone/pager so you know that movement has been detected or e-mails a still picture to you

Works with Windows 98 SE, ME, XP and 2000 with a 300MHz or above processor

**(Please Note that this is the software only)**
