Notes

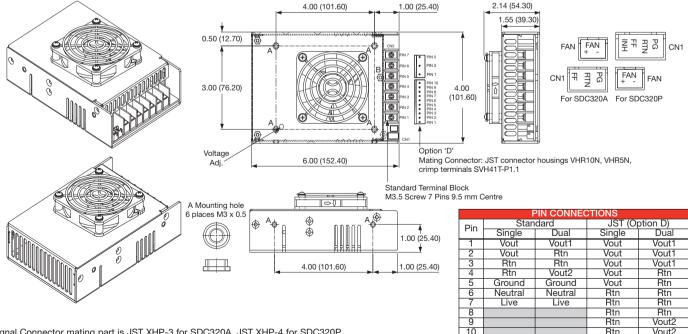

- 1. Peak load can be taken for 500 µs. Average power not to exceed nominal power.
- 2. Add suffix '-L' to model number for optional 500 µA leakage current ('A' input version only).
- 3. Ripple & noise is measured using 0.1 μF ceramic capacitor in parallel with 22 μF electrolytic and 20 MHz bandwidth.
- 4. Convection-cooled rating for SDC320PS05 is 130 W, 26 A.
- 5. Forced air cooled rating for SDC320PS09 is 320 W, 35.5 A.
- 6. Convection-cooled rating for SDC320PS09 is 180 W, 20 A.
- 7. Available for OEM quantities, contact Sales.

Mechanical Options

- Add suffix '-F' to the model number for a top fan cover (forced air cooled ratings apply).
- Add suffix '-E' to the model number for an end fan cover (forced air cooled ratings apply).
- Add suffix '-C' to the model number for a U-channel with vented cover. For 'A' input models, convection-cooled output power available 125 W for 5 V & 9 V model & 170 W for other single output models. Convection-cooled output power available for 'P' input models is not affected by adding vented cover. Forced air cooled rating is available for 'P' input models with vented cover.
- · Add suffix 'D' to the model number for JST connector, not available on SDC320AS05 or SDC320PS05, OEM quantities available, contact Sales.
- If no suffix is added to the model number the unit is a U-channel, convection-cooled ratings apply or external fan cooling required (22 CFM for 5 V model, 18 CFM for all other 'A' models and 27 CFM for all 'P' models).

Note:

- 1. Applying <0.3 V or short between the pins turns the output OFF.
- 2. Applying >4.5 V or open circuit between the pins turns output ON.
