**raaco**

**raaco COMPACT 50 + 62**

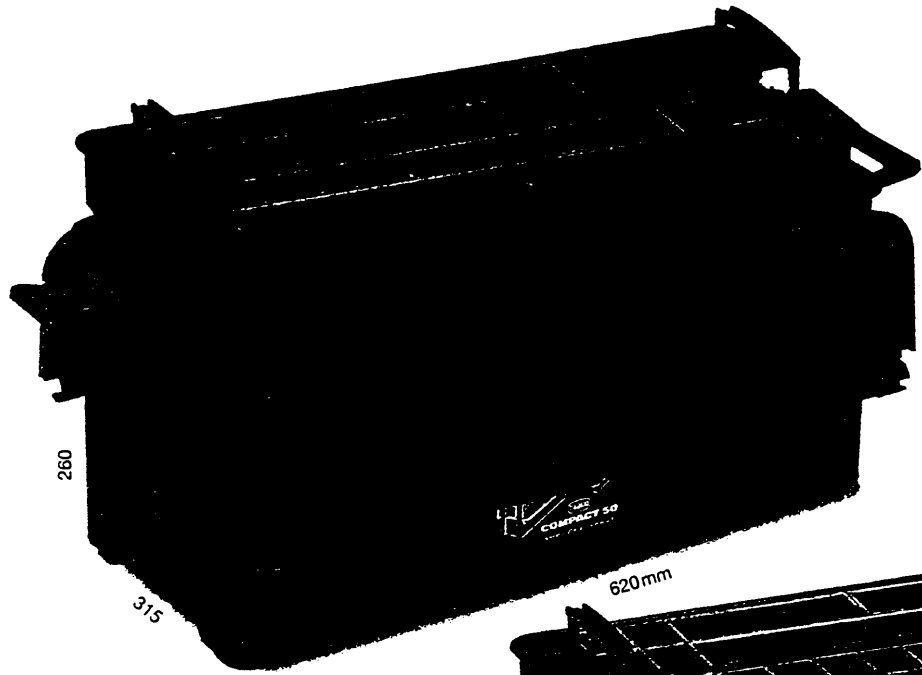

The "Professionals" of the Toolbox range.

Despite their extremely light weight, they have an exceptionally high load bearing capacity.

Even when open, the Compact remains "slim" and retains its stability.

There is ample space under the removable tote tray for tools and small parts.

Rounded corners prevent injuries and damage.

**raaco**

**COMPACT 50**

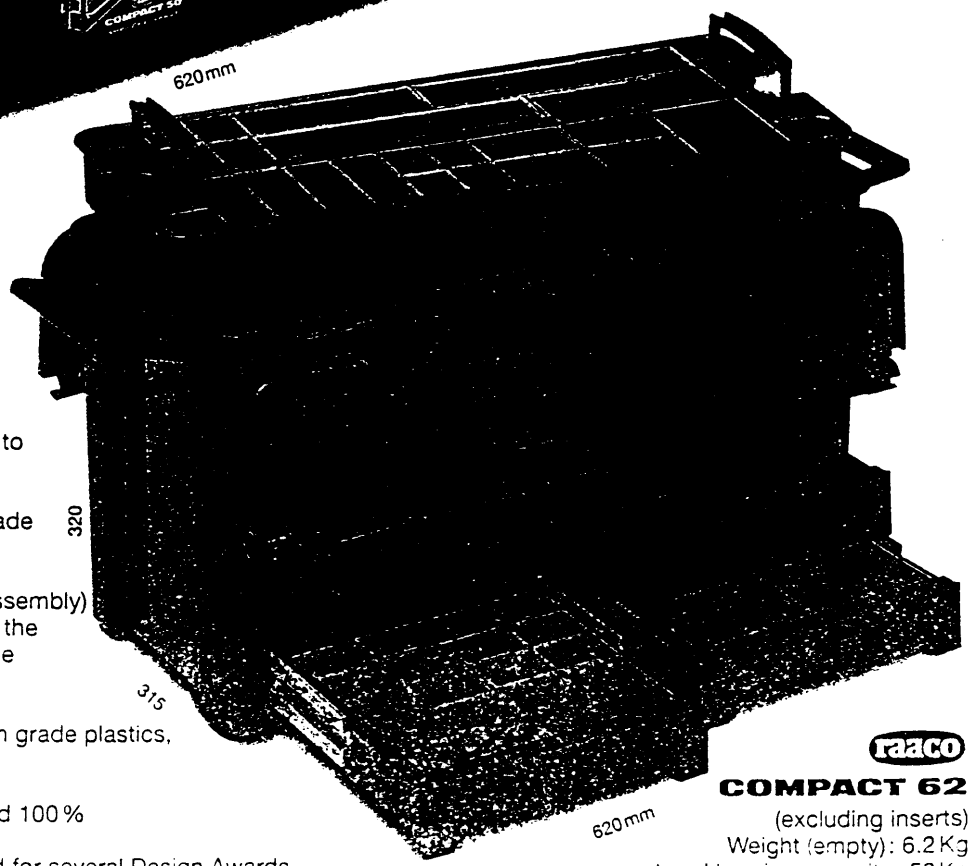

(excluding inserts)

Weight (empty): 3.8Kg

Load bearing capacity: 50Kg

**raaco COMPACT**, means:

- Toolboxes spacious enough to accommodate even large items, such as hacksaws, spirit levels, etc.
- they do not rust
- they remain inherently stable
- they are weatherproof and resistant to chemical attack
- they are manufactured from high grade Copolymer Polypropylene
- the principle "DfD" (Design for Disassembly) was taken into consideration during the construction phase (each part can be individually replaced)
- the products are produced from high grade plastics, using no metal parts or adhesives
- they can be environmentally recycled 100%
- this range has also been put forward for several Design Awards

**raaco**

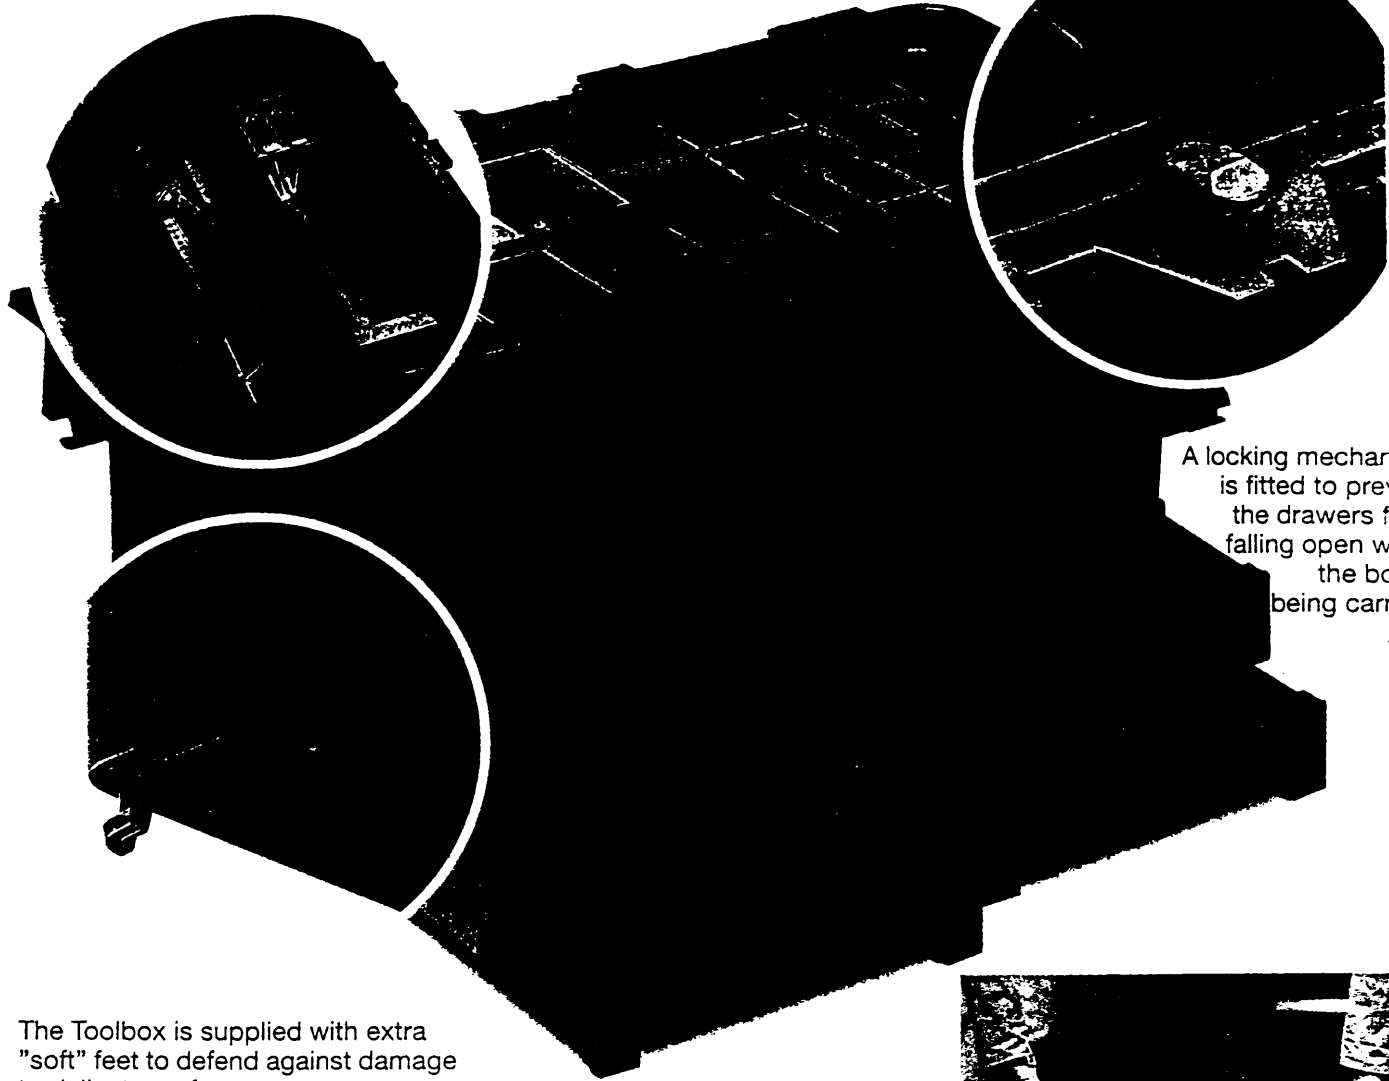

**COMPACT 62**

(excluding inserts)

Weight (empty): 6.2Kg

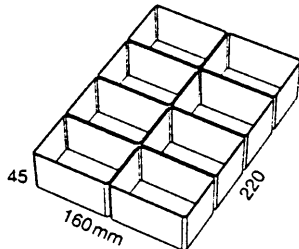

Load bearing capacity: 50Kg

The space under the tote tray can be divided lengthwise to better utilise the storage area using a divider, which is included.

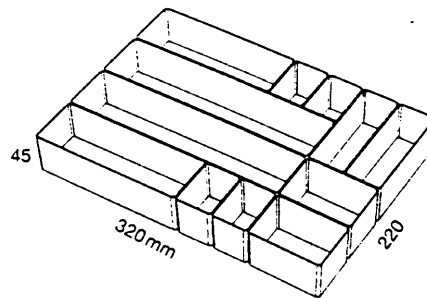

A locking mechanism is fitted to prevent the drawers from falling open while the toolbox is being carried.

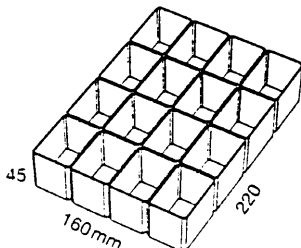

The Toolbox is supplied with extra "soft" feet to defend against damage to delicate surfaces.

**raaco** VARIO SET 4-16

Compact 50 + 62 can be easily carried by the large handle across the top, or using the two recessable handles which are located one at either end of each of these Toolboxes.

**raaco** VARIO SETS

Inserts to provide organised storage for small parts in both the tote tray and drawers, offering a clear view of contents and being readily available to hand.

## TRAGO COMPACT 50 & 62

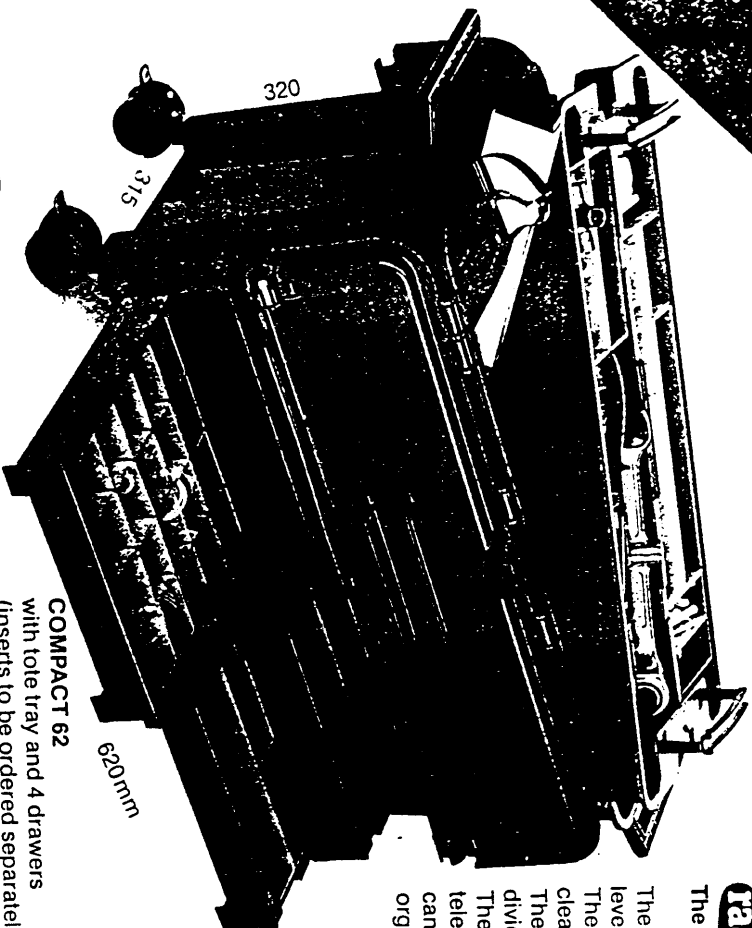

### The unique Toolboxes

The COMPACT 50 & 62 Toolboxes are large enough to accommodate even large items, such as hacksaws, spirit levels, etc.

The tote tray, with 2 recessable handles, can be equipped with inserts (see page 31) of eight different sizes, offering a clear overall view of all small parts.

The space under the tote tray of both the 50 & 62 can be divided lengthwise to better utilise the storage area and the divider is included in the delivery.

The COMPACT 62 also has four drawers which are fitted on telescopic rails ensuring easy and safe handling. These drawers can also be fitted with inserts (see page 31), again offering more organised storage for small parts.

Weight (empty)  
6,2 kg

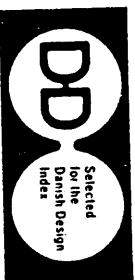

**COMPACT 62**  
with tote tray and 4 drawers  
(inserts to be ordered separately)  
Catalogue No. 112888

Both Toolboxes are equipped with soft plastic feet to protect delicate surfaces which, are also removable. Alternatively, the 50 & 62 can be fitted with 4 castors (two of which can be locked) to allow extra mobility.  
Catalogue No. 113694

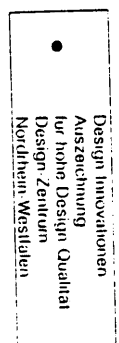

A locking device keeps the drawers closed while in transit, for safety.

We are sure that you, as a user of these unique Toolboxes, will appreciate all these features. After all, COMPACT Toolboxes have already received several awards from International Juries:

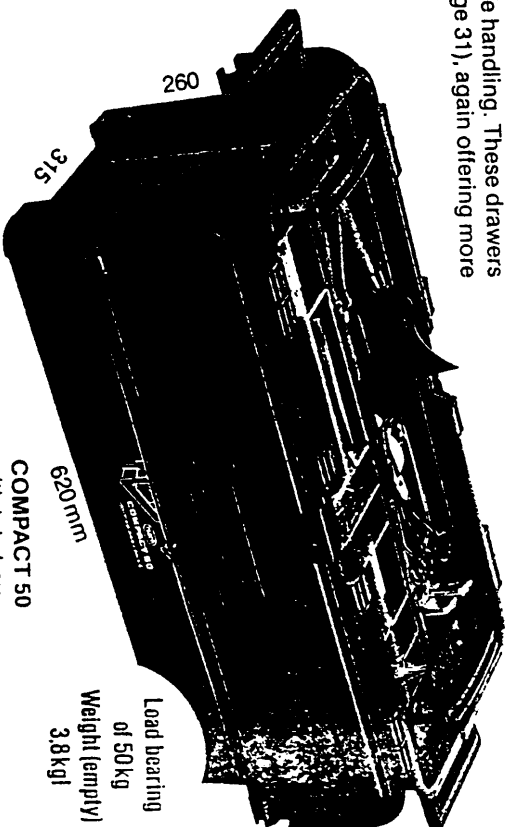

Auszeichnung für gutes Design 1991

Furthermore, Trago Professional SERVICE CASES and Toolboxes are the first and only boxes to date, manufactured worldwide, with consideration given to today's ecological concerns:

- 'DfD' (Design for Disassembly) is taken into consideration during the construction phase.
- These products are made of one material only, no metal parts or adhesives are used.
- Ecological recycling is the final stage - when, after a long life, the products can no longer be used.
