

Agilent U1700 Series handheld LCR meters expand Agilent's portfolio of handheld tools into electronics assembly and passive components troubleshooting. Better yet, these handheld models extends the tradition of Agilent's industry-leading benchtop units to more affordable and portable forms. Agilent's latest handheld LCR meters in all-new orange offer capabilities and functionalities equivalent to the A models.

## Features

- 20,000 counts resolution
- Dual display with backlight (for U1732A/U1732B)
- Wide LCR ranges with 2 to 4 selectable test frequencies
- Auto-calculation of phase angle (for U1732A/U1732B), dissipation factor and quality factor
- Tolerance mode: $1 \%, 5 \%$ and $10 \%$
(20\% with U1732A/U1732B)
- Relative mode
- Hold and Min/Max/Average recordings
- Data logging to PC with optional IR-to-USB cable

## Agilent U1700 Series Handheld LCR Meters

Data Sheet

## Test passive components conveniently, affordably and reliably with the Agilent U1700 Series LCR meters - extending the tradition of industry-leading benchtop units

## No waiting for quick, basic LCR tests

Sharing a bench LCR meter is practical, but isn't always convenient. With Agilent's new line of handheld LCR meters, you can perform quick, basic LCR measurements at your convenience. Now that they're available at a lower price point compared to traditional benchtop units, everyone on your team can be equipped for passive-component testingon the bench or on the go-without the wait.

Figure 1: Automate the recording of continuous readings when you hook the U1731A/U1731B/U1732A/U1732B to a PC

## Uncompromised quality and reliability

The handheld LCR meters are housed in robust overmold and tested to stringent industrial standards. Each LCR meter is also sealed with a three-year warranty and the assurance that you can test your components with confidence.
