Description

General Notes

The indicators, illuminated pushbuttons, selector switches, keylock switches and emergency stop switches with spray-water protection at the front (IP 65) are modular and consist of an actuator and switching element. In addition to the standard switching elements (gold-plated silver contact with universal soldering or plug-in terminals), forced-opening, slow-make switching elements with gold or silver contacts and soldering or plug-in terminals are available. They can be supplied with screw terminals and silver contacts too. The front dimensions of the units in this series are 24 x 24 mm, 24 mm dia., 18 x 24 mm, 18 x 18 mm or 18 mm dia. For flush mounting the dimensions 25 mm dia., 24 x 30 mm and 24 x 24 mm can be supplied.

Mounting

All switch actuators are mounted from the front by pushing them through the mounting hole in the front panel. They are then fixed from the back with a fixing nut and the mounting tool typ no. 01-907. Max. tightening torque 50 Ncm. For mounting dimensions and grid size see as of page 462.

The preassembled switching element with the connecting wires in a single plane can be clipped on afterwards. For block or series mounting aids are available.

For switching elements with 2.8 mm plug-in terminals, we offer plug-in bases, which when soldered to a PCB enable a plug-in connection to the button. All actuators are provided with an anti-rotation device.

Lenses

The flat or concave lenses are available in various colours and a transparent or translucent version. The lens surface is non-reflecting (matt). Lenses 19.7 mm dia. can be supplied also in aluminium.

Marking

For engraving, hot stamping and film inserts, see page 475 under "Marking".

Illumination

The midjet-grooved T 1 3/4 incandescent lamp (6-48 V, 1.2 W) ensures perfect illumination of the lenses, which are supplied in various colours.

Midjet-grooved T 1 3/4 Multi-LED (6, 12, 24, 48 V) are also available in white, red, yellow and green.

For supply voltages above 60 V, it is necessary to use a voltage reduction element (external series resistor, capacitor or transformer).

Do not solder the terminals directly, because of the high surface temperature.

Position indication

When the switch with maintained action is actuated, the lens snaps into place mechanically. The position of contacts can always be determined by the position of the lens.

Keylock switch

Standard lock (index D)

1 standard number 311. If the lock number is not specified, we will supply no. 311. An additional 134 special locks (index X) are available on request. Master keys for locks no. 311 - 445 may be ordered by quoting no. 31-989.300.

Two keys are supplied with each keylock switch.

Spare keys for DOM standard locks may be ordered by quoting no. 31-989 (please state the lock number).

Emergency stop switch foolproof with key to unlock

Kaba safety lock. Standard lock number is 1001. Locks with other numbers are available on request.

Spare keys for KABA locks may be ordered under no. 14-987 (please state the lock number).

Specimen order

Indicator complete

- indicator complete, soldering terminal, 18 x 24 mm 61-0030.02

Recommended accessories:

- lens plastic, 18 x 24 mm, clear 61-9331.7
- LED, 6 chips, 6 VDC, yellow 10-5306.3254

All dimensions in mm.

We reserve the right to modify technical data.

illuminated-/pushbutton

- 1 lens
- 2 actuator case
- 3 fixing nut
- 4 switching element

illuminated-/pushbutton for flush mounting

- 1 lens
- 2 actuator housing
- 3 front bezel
- 4 sealing
- 5 front panel
- 6 fixing bow
- 7 fixing nut
- 8 switching element

actuator with snap-action switching element

switching system

switching system

Self-cleaning, double-break snap-action switching system with contact opening width 2 x 0.5 mm (= switch with small contact opening width as per EN/IEC 61058-1 section 7.1.11!).

The switching elements are optionally equipped with the following switching functions

1 to 3 NO or NC, or any combination of NO and NC, but the number of switching elements cannot exceed 3.

The switching elements provided for the 3-position actuators are equipped with 1 or 2 NC, 1 or 2 NO, or with 1 NO and 1 NC (therefore the number of switching elements cannot exceed 2)

material

lenses

Polymethyl methacrylate (PMMA), polycarbonate (PC) or aluminium (anodized)

front bezel

polyetherimide PEI and chromium plated

front ring

Aluminium anodized

material of contacts

Silver or silver with gold plating

switching element

diallyl phthalate (DAP) and polyamide 66 (PA 66)

actuator case

Polyether imide (PEI) self-extinguishing

mechanical characteristics

connection method

Solder lugs (cross-section 2.8 x 0.5 mm)
for connection of wire \geq 1.5 mm or flex 1.5 mm

These solder lugs may be connected by means of spade terminal sockets 2.8 x 0.5 mm, if switching is operated to a safety low-voltage.

actuating torque

with selector or key switches (with snap-action switching elements):
2.5-10 N cm,
depending on switching element component

actuating force

with pushbuttons (with snap-action switching elements) 2.7-3.6 N,
depending on switching element component

actuating travel

illuminated pushbutton: 3 mm

2-position selector or key switch:
momentary action design approx. 42°
maintained action design approx. 90°
3-position selector or key switch:
momentary action design approx. 2 x 42°
maintained action design approx. 2 x 90°

switch actuator with 3 positions:
2 x ca. 42° deflection momentary action
2 x ca. 90° deflection maintained action

storage temperature

Permitted range of ambient temperature for storage or transport -40°C to +85°C

mechanical life

as per IEC 512-5-6
momentary action 2 million cycles of operation
maintained action 1 million cycles of operation
keylock switch 50'000 cycles of operation
selector switch 100'000 cycles of operation

rebound time

on closing the contact = 3 ms
on opening the contact = 5 ms
testing based on DIN 41640 Part 85, draft 87 (no valid successor document). The rebound times apply to normal manual activation.

resistance to shock

semi-sinusoidal signal impacts with peak acceleration 50 g and surge width 11 ms (tested as per IEC 60068-2-27).

degree of protection

(penetration of water or foreign bodies)
actuators front side IP 65
switching elements attached to actuator IP40
(without taking into consideration the contactability of the connections)

resistance to vibration

with sinusoidal dynamic load 10 Hz to 58 Hz, amplitude of oscillation 0.75 mm, 58 Hz to 2000 Hz, peak value of the acceleration 10 g (tested as per IEC 60068-2-6).

ambient air temperature

-25°C to + 55°C

As "ambient temperature in operation" is firstly the temperature of the air in the interior of the device, secondly the temperature of the air on the front exterior of the device and thirdly the temperature of the operation panel in which the switches are situated

electrical characteristics

rated voltage

250 VAC/VDC

rated current

6 A

contact resistance

with snap-action switching elements in new state
silver contact: as per IEC 60512-2-4, Test 2b, measured at 10 or 100 mA, 20 V
gold plated contact+C204: as per IEC 60512-2-3, Test 2a, measured at 20 mV, 10 mA = 50 mΩ

electrostatic breakdown value

\geq 11 KV (keylock switch)

continuous thermal current I_{th2}

5 A

The maximum current in continuous operation and at ambient temperature not exceeding the quoted maximum values.

switch rating

of the snap-action switching element with silver contacts or silver contacts with gold plating (as per EN/IEC 60947-5-1)
service category rated operating voltage (as per EN/IEC 60947-5-1, 4-3.3.1)

rated operating current (as per EN/IEC 60947-5-1, 4.3.2.3)

AC-15	250 VAC	2 A
DC-13	125 VDC	0.15 A

Recommended minimum operational data for snap-action switching element with silver contacts
operating voltage operating current
20 VAC/VDC 100 mA

Recommended minimum operational data for snap-action switching element with gold plated silver contacts

switch rating AC, cos. ϕ 0.7:

rated service voltage	250 VAC	125 VAC	110 VAC
rated service current	2 A	3 A	3 A

switch rating DC, L:R=30 ms:

rated service voltage:	220 VDC	110 VDC	60 VDC	24 VDC

actuator with slow-make switching element

switching system

switching system

double-break slow-make system, contact opening width 2 x 1.5 mm, with 2 x 2 contact points per switching element .
NC - contact elements in the slow-make elements fulfill requirements of switches with forced opening as per EN/IEC 60947-5-1, section

The slow-make elements are optionally obtainable with the following switching functions:

1 or 2 NO or NC, or 1 NO and 1 NC.

material

lenses

polymethyl methacrylate (PMMA), polycarbonate (PC) or aluminium

front bezel

made of polyether imide PEI

front ring

Aluminium anodized

material of contacts

silver, gold (specified for operation for low level switching)

slow-make elements with gold contacts do not have certification documents.

switching element

diallyl phthalate (DAP) and polyamide 66 (PA 66)

actuator case

polyetherimide PEI, self-extinguishing

mechanical characteristics

connection method

solder lugs (cross-section 2.8 x 0.5 mm)
for max. 2 individual wires with 1 mm

These solder lugs may be connected by means of spade terminal sockets 2.8 x 0.5 mm, if switching is operated to a safety low-voltage.

screw terminals

for flex 1 mm

or for single wire \varnothing 1.2 mm

actuating torque

with selector or key switches 4-16 N cm depending on the switching element component

actuating force

with pushbuttons (with slow-make elements) 3.5-11 N depending on the switching element component
with emergency button max. 65 N

actuating travel

illuminated pushbutton: 3 mm

2-position selector or key switch

momentary design approx. 42°

maintained design approx. 90°

3-position selector or key switch

momentary action design approx. 2 x 42°

maintained action design approx. 2 x 90°

emergency buttons 10 mm

switch actuator with 3 positions:

2 x ca. 42° deflection momentary action

2 x ca. 90° deflection maintained action

storage temperature

-40°C +85°C permitted range of ambient temperature for storage or transport

ambient air temperature

-25°C to +55°C As "ambient temperature in operation" is firstly the temperature of the air in the interior of the device, secondly the temperature of the air on the front exterior of the device and thirdly (as per DIN IEC 68-)

mechanical life

as per IEC 512-5-6

momentary action	2 million cycles of operation
maintained action	1 million cycles of operation
keylock switch	50'000 cycles of operation
selector switch	100'000 cycles of operation
emergency stop switch	50'000 cycles of operation

rebound time

on closing the contact = 2 ms
on opening the contact = 2 ms
testing based on DIN 41640 Part 85, draft 87 (no valid successor document) The rebound times apply to normal manual activation.

resistance to shock

1. Continuous light

1. Engraving

Typefaces

In addition to the most commonly used world languages (see DIN 1451) with close spacing, the following typefaces are available: Scandinavian, Slavian, Greek, Russian.

Coloured filling of engraving

Specify whether engraving should be on the diffuser, or on the lens.
Specify the infill colour, character height and the text or symbol orientation.

Symbols

A list of the symbols available can be supplied on request.

2. Hot stamping

For large batches it is worth while to have the lettering produced by hot stamping.

Typefaces

For letters and figures, typefaces with 2,5 mm, 3 mm and 4 mm are available.

Symbols

A list of the symbols available can be supplied on request.

Important!

Before engraving, check the position of the illuminated pushbutton or indicator

Height of letters mm	(switch) lens Thickness of letters mm	(18 x 24) 15,3 x 21,5 mm			(Ø 18) Ø 15,8 mm			(18 x 18) 15,3 x 15,3 mm

Film dimension		□ max. 12,7 x 18,7 mm						Ø 12,8 mm			□ 12,7 x 12,7 mm		

3. Film inserts

Instead of using engraving, the lenses can be fitted with transparent film inserts.

For this purpose, though, it is advisable to use transparent lenses. When a smoked lens is used, the lettering does not become visible until the lamp lights.

Film dimensions

16,9x16,9 mm
11,9x11,9 mm
max 11,9x18,0 mm

Film thickness

0.2 mm

Important!

Before engraving, check the position of the illuminated pushbutton or indicator.
