

TMS320-JTAG-USB XDS100 - THE WORLD'S LOWEST COST DSP USB JTAG FOR PROGRAMMING AND EMULATION SOLUTION

FEATURES

- TMS320-JTAG-USB hardware is designed to utilize the XDS100 software
- program all TMS320F C28xx flash 32-bit Real Time Microcontrollers (DSP), not XDS510 compatible, but have own CCS 3.30 drivers and support
- supports all members of C2800 family C54/55x and C674x (more to be implemented in future)
- uses standard 0.1" 2x7 pin and 2x10 pin JTAG connector
- no need for external power supply, all power is taken from USB and the target
- compatible with Code Composer Studio 3.30 software for programming, real time emulation, debugging, step by step program execution, breakpoints, memory dump etc everything all high priced emulators do
- dimensions 50x40 mm (2x1.6") + 20 cm (8") cable
