

World Class Test Equipment

Testing, Measuring and Safety Instruments

The whole range of testers from one supplier

IEC/EN 61243-3
DIN VDE 0682-401
voltage class B

Top-class test equipment DUSPOL® expert, the measure of all things

Top-class test equipment

DUSPOL® voltage testers

- tested and approved according to the international standard IEC/EN 61243-3 (DIN VDE 0682-401), voltage class B
- vibrating alarm for safe voltage detection
- no measuring errors due to irritating capacitive and inductive voltages by means of intended load connection via push buttons
- intended release of a 30 mA FI safety switch
- acoustic continuity check via buzzer and LED/LCD
- phase-sequence indication with arrows „→,←,↻“
- safe single-pole phase test
- precise illumination of the measuring point
- shock-resistant, dust-proof and splash-proof housing (protection class IP 64)
- LC display illumination that is activated automatically by means of a light sensor

Digital Multimeter BENNING MM 7 – MM 11

safety and functional diversity without any compromises

BENNING MM 7

Digital Multimeter for precise and reproducible measuring results

- TRUE RMS measuring method for industrial applications
- reliable and precise measuring results even in case of distorted or non-sinusoidal signal behaviour
- basic measurings for current, voltage, resistance, continuity, diode, capacity, frequency and temperature
- LC display with analog bar graph indication with back illumination

TRUE RMS

MM 7

tested and approved

IEC/EN 61010-1
(DIN VDE 0411-1)

BENNING MM 11

Precision Digital Multimeter with extraordinary features of performance

- highest measuring accuracy of 0.06 % due to TRUE RMS measuring method and 20000 digit resolution
- an ideal measuring device for recording of measuring processes
- large memory capacity of 1000 storage locations and 40000 storage locations for Data Log functions
- transmitting measuring results via optical USB interface
- delivery including software *BENNING PC-Win MM 11*

BENNING MM 8, MM 9, MM 10

Digital Multimeter of the highest measuring category CAT IV

- highest measuring category CAT IV 600 V allows measurements direct at the source of the low-voltage installation
- precise due to TRUE RMS measuring method
- transmitting measuring results via optical USB interface
- delivery including software *BENNING PC-Win MM 10*

Software for logging and analysis

- software for reading and logging of measurement series
- visualisation of measurement series via line diagram and table
- scanning rate variable from 0.5 sec. up to 10 min.
- storage of measurement series as text file

Digital Current Clamp Multimeter

BENNING CM 1-1 – CM 1-3, CM 2, CM 3, CC 1, CC 2

BENNING CM 1-1, CM 1-2 and CM 1-3

Digital Current Clamp Multimeter for AC current
 Innovative technology, practical design

- safe current measuring up to 400 A AC
- measuring inputs for voltage, resistance, continuity and diode test
- integrated volt sensor signals phase voltages by means of an acoustic signal and a red LED signal (CM 1-3)
- it localizes cable breaks and defective lamps in exposed cables (cable reel, light chains) via the feeding side of the phase (CM 1-3)

BENNING CM 2 and CM 3

Digital Current Clamp Multimeter for AC/ DC current

- safe and non-contact measuring of high currents
- DC and AC current measuring up to 600 A AC/DC
- measurement of low currents (automotive, photovoltaics, industry) (CM 2)
- measuring inputs for voltage, resistance and continuity test (CM 2)

BENNING CC 1 and CC 2

Current Clamp Adapter for Multimeter

- safe AC current measuring up to 200 A/400 A
- connection via 4 mm safety measuring leads
- output: 1 mV AC/1 A AC (CC 1), 1 mA AC/1 A AC (CC 2)

tested and approved

Digital Current Clamp Multimeter

BENNING CM 4 – CM 9

BENNING CM 4 - CM 7

Digital Current Clamp Multimeter of the highest measuring category

Safety without any compromises

- multi-functional and powerful due to TRUE RMS measuring method for industrial applications
- safe current measuring up to 1000 A AC/DC
- highest measuring category CAT IV 600 V allows measurements directly at the source of the low-voltage installation
- LC display and background illumination for all types

BENNING CM 8

Power Current-Clamp Multimeter

Power analysis for single-phase and three-phase mains

- TRUE-RMS measurements up to 1000 V, 600 A AC/DC
- effective power measurements up to 600 kW
- calculation of the power factor $\cos \varphi$
- indication of the load type (inductive, capacitive)
- bipolar phase sequence test in three-phase mains
- measuring inputs for voltage, resistance, continuity, diode, frequency and temperature
- measurement of inrush currents (motors etc.)

BENNING CM 9

Leakage Current Clamp with a Resolution of 1 μ A
The alternative solution for insulation measurements

- measurement of leakage currents and differential currents in electrical systems (VDE 0100) and devices (VDE 0701/0702, BGV A3, BetrSichV (= German Health and Safety at Work Regulations))
- highest resolution of 1 μ A in the 6 mA measuring range
- measurement without switch-off during normal operation of the system/device, the perfect solution for preventive maintenance
- analog output (mV/A) for transmission of measured values
- precise and reproducible measuring results up to 100 A
- optimum screening against external magnetic fields

All Digital Current Clamps Including protective case, Safety measuring leads and battery set.

Safety Instruments BENNING IT 100, IT 110 and IT 120

Testing of electrical systems in compliance with the standards

BENNING IT 100

Insulation and Resistance Measuring Device

- safety tests on electric systems and equipment
- measuring of the insulation resistance with testing voltages of 250 V, 500 V and 1000 V
- low-impedance measurements with testing current of 200 mA for continuity tests of protective conductors and equipotential bonding conductors
- measuring of the residual battery capacity in %
- large LC display with analogous bar graph indication and background illumination
- including service case, measuring leads, crocodile clips and battery set

BENNING IT 110, BENNING IT 120

Installation Testers

For safety tests on electrical systems according to DIN VDE 0100 and IEC 60364

Multifunctional installation testers for complete testing and efficient troubleshooting of electrical systems

- measurement of the protective conductor line and of the equipotential bonding line with a testing current of 200 mA
- measurement of the insulation resistance with testing voltages of 100 V, 250 V, 500 V and 1000 V
- line impedance and loop impedance measurement (optional without tripping of the RCD) with calculation of the short-circuit current (PFC/ PSC)
- complete testing of the residual-current-operated device (RCD)
- measurement of contact voltage (without tripping), tripping time and tripping current (ramp test) of residual current operated device (RCD)
- phase-sequence testing in three-phase mains
- voltage measurement up to 500 V and online voltage monitoring

voltage, frequency	1 V - 500 V, 45 Hz - 65 Hz
item no.	044100

BENNING IT 110, IT 120 Installation Testers

The perfect solution for efficient testing

Features

BENNING IT 110, BENNING IT 120

- all measuring functions can be selected directly by means of a rotary switch
- switchable probe tip for releasing the measuring process
- graphic display and help function with connecting diagram
- complete measuring result with measuring parameters, limiting value and symbols for PASS / FAIL
- current supply by means of 6 NiMH storage batteries (AA) with charger

Additional functions

BENNING IT 120

in addition to the *BENNING IT 110*:

- current measurement (TRUE RMS) by means of current clamp adapter (optional)
- illumination measurement by means of lux sensor (optional)
- earthing measurement by means of three-wire measuring method (optionally with earthing set)
- integrated measured value memory for 500 measurements
- USB and RS 232 interface
- *BENNING PC-Win IT 120* software included in delivery

Logging software with Test Log according to ZVEH

BENNING PC-Win IT 120

- PC software for reading the stored test data
- Creation of test logs with handover and status report according to ZVEH
- Structuring and export function of the test data

BENNING 700 Tester according to VDE 0701/0702 For testing portable electrical equipment

BENNING 700

Tester for safety tests and repetitive tests according to DIN VDE 0701/0702 and UVV BGV A3, BetrSichV (German Health and Safety at Work Regulations)

- DIN VDE 0701: tests on repaired and modified electric devices
- DIN VDE 0702: repetitive tests on electric devices

Test routines either in automatic or manual mode

- measurement of protective-conductor resistance with test current 200 mA/10 A
- measurement of insulation resistance
- measurement of protective-conductor current and contact-current using differential current process
- measurement of substitute earth leakage test
- test of voltage absence by measuring differential current
- function test after safety test passed (voltage, current)

Features of the BENNING 700

- standard equipment with measured value memory for 199 test samples, PC interface, connection for barcode scanner and optional software *BENNING PC-Win 700*
- indication of the respective testing steps by means of LED and indication of measured values and limiting values via LC display
- „PASS“/„FAIL“ indication by means of red error LED
- appropriate for electrotechnically trained personnel
- test sample identification via barcode scanner / barcode labels

BENNING PC-Win 700 Software

- professional software for logging, evaluation and archiving of the recorded measured values
- comfortable transmission of the test data to the *BENNING 700* tester

Test record for electrical devices VDE 0701/0702, BGV A3

Voltage, Continuity, Load Tester Phase-Sequence Indicator

PROFIPOL®

Universal voltage tester

- indicating DC and AC voltage within the range of 6 - 400 V
- indicating steps 6, 12, 50, 230, 400 V
- polarity test for DC voltage
- shock-resistant, dust-proof and splash-proof housing, protection class IP 65

Z-TESTER

Load tester for testing low-voltage meters

- testing of the meter starting capability
- functional control by power connection of 50 W/100 W
- control of phase voltages (230/400 V)
- overload protection by means of integrated temperature monitoring

TRITEST® control

Phase-sequence indicator for testing the phase sequence in three-phase mains

- indication of clockwise and anti-clockwise phase sequence
- indication of the phase voltages L1, L2 and L3
- voltage range: 400 - 690 V (50 - 60 Hz)
- bright LED pocket lamp function
- including safety probe tips and alligator clip

tested and approved

IEC/EN 61243-3
(DIN VDE 0682-401)

tested and approved

IEC/EN 61010-1
