**RAP2-BA3**

**RAP2-BA4**

**RAP2-BA5**

**RAP2-BA6**

**RAP2-BA334**

**RAP2-BA335**

The RAP2 range of push button switches is manufactured to give protection to IP67. The unique double seals on the push buttons ensure that no moisture or dust can get behind the switch and stop it operating in adverse conditions such as freezing rain, likewise the two and three position selector switches have a doubled lipped O ring and inner seal giving the same protection. The switches are suitable for use in all outdoor applications and in industries, such as the automotive and food industry where constant washing, salt spray and other substances would, ordinarily, cause switches to fail.

### 22.5mm Selector Switches

**RAP2-BD2** (2 Position)

**RAP2-BD3** (3 Position)

### Accessories

#### Mounting Clip

**RAP2-BHZ**  
(\*sold separately)

#### Contact Blocks

**RAS-CBNO**  
Normally open  
(Front mounted)

**RAS-CBNC**  
Normally closed  
(Front mounted)
