

features

- BS EN 60950 Certified
- 5.2kVDC Isolation (1 Minute)
- Dual Outputs
- Power Sharing
- SIP Package Style
- Efficiency to 80%
- Power Density 0.42W/cm³
- 5V & 12V Input
- 5V, 9V, 12V & 15V Output
- Pin Compatible with NMV Series SIP DC-DC Converters
- Footprint 1.91cm²
- UL 94V-0 Package Material
- No Heatsink required
- Internal SMD Construction
- Toroidal Magnetics
- Fully Encapsulated
- MTTF up to 1.6 Million Hours
- PCB Mounting
- Custom Solutions Available

description

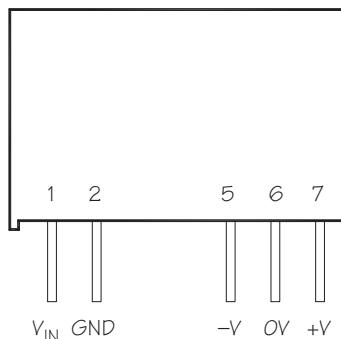

The NMJ series are dual output DC-DC converters in a 7 pin SIP package style offering pin and functionality compatibility with the NMV series SIP DC-DC converters. The series was tested by British Standards Institute (BSI) and received certificate number 8105 confirming compliance with BS EN 60950 safety standards and BS EN 41003 for supplementary insulation. The NMJ series is suitable for applications where safety and miniaturisation are of paramount importance.

EN 60950 is derived from IEC 950 and is equivalent to UL 1950 and CSA 950 standards.

- i When operated **without** additional external load capacitance, the output voltage of the NMJ devices is guaranteed to be within 95% of its steady state value within 100ms after the input voltage has reached 95% of its steady state value, **irrespective of the rise time of the input voltage**.
- ii When operated **with** additional external load capacitance the rise time of the input voltage will determine the maximum external capacitance value for guaranteed start up. The slower the rise time of the input voltage the greater the maximum value of the additional external capacitance for reliable start up.

¹ Supply voltage must be discontinued at the end of the short circuit duration.
