

Cylindrical Proximity Sensor E2A

Safe Mounting with Greater Sensing Distance

- Ensures a sensing distance approximately 1.5 to 2 times larger than that of any conventional OMRON Sensor.
- Problems such as the collision of workpieces are eliminated.
- Full range of standard sizes (M8, M12, M18 and M30; both long and short barrels)
- Modular construction simplifies customization.

Example: E2A-M12LS04-M1-B1 Standard, M12, long barrel, shielded, Sn=4 mm, M12 connector, PNP-NO
 E2A-M08KN04-WP-B1 5M Standard, M8, short barrel, non-shielded, Sn=4 mm, pre-wired PVC cable, PNP-NO, cable length=5 m

1. Basic name

E2A

2. Sensing technology

Blank: Standard double distance

3. Housing shape and material

M: Cylindrical, metric threaded, brass

S: Cylindrical, metric threaded, stainless steel

4. Housing size

08: 8 mm

12: 12 mm

18: 18 mm

30: 30 mm

5. Barrel length

K: Standard length

L: Long body

6. Shield

S: Shielded

N: Non-shielded

7. Sensing distance

Numeral: Sensing distance: e.g. 02=2 mm, 16=16 mm

8. Kind of connection

WP: Pre-wired, PVC

M1: M12 connector (4-pole)

M3: M8 connector (4-pole)

M5: M8 connector (3-pole)

9. Power source and output

B: DC, 3-wire, PNP open collector

C: DC, 3-wire, NPN open collector

D: DC, 2-wire

E: DC, 3-wire, NPN voltage output

F: DC, 3-wire, PNP voltage output

10. Operation mode

1: Normally open (NO)

2: Normally closed (NC)

11. Specials (e.g., cable material, oscillating frequency)

12. Cable length

Blank: Connector type

Numeral: Cable type

Sensing distance		2 mm ± 10%	4 mm ± 10%	4 mm ± 10%	8 mm ± 10%		
Setting distance		0 to 1.6 mm	0 to 3.2 mm	0 to 3.2 mm	0 to 6.4 mm		
Differential travel		10% max. of sensing distance					
Target		Ferrous metal (The sensing distance decreases with non-ferrous metal.)					
Standard target (mild steel ST37)		8×8×1 mm	12×12×1 mm	12×12×1 mm	24×24×1 mm		
Response frequency (See note 1.)		1,500 Hz	1,000 Hz	1,000 Hz	800 Hz		
Power supply voltage (operating voltage range)		12 to 24 VDC. Ripple (p-p): 10% max. (10 to 32 VDC)					
Current consumption (DC 3-wire)		10 mA max.					
Output type		-B models: PNP open collector -C models: NPN open collector					
Control output	Load current (See note 2.)	200 mA max. (32 VDC max.)					
	Residual voltage	2 V max. (under load current of 200 mA with cable length of 2 m)					
Indicator		Operation indicator (Yellow LED)					
Operation mode (with sensing object approaching)		-B1/-C1 models: NO -B2/-C2 models: NC For details, refer to the timing charts.					
Protection circuit		Power source circuit reverse polarity protection, Surge suppressor, Short-circuit protection		Output reverse polarity protection, Power source circuit reverse polarity protection, Surge suppres- sor, Short-circuit protection			
Ambient air temperature		Operating: -40°C to 70°C, Storage: -40°C to 85°C (with no icing or condensation)					
Temperature influence (See note 2.)		±10% max. of sensing distance at 23°C within temperature range of -25°C to 70°C ±15% max. of sensing distance at 23°C within temperature range of -40°C to 70°C					
Ambient humidity		Operating: 35% to 95%, Storage: 35% to 95%					
Voltage influence		±1% max. of sensing distance in rated voltage range ±15%					
Insulation resistance		50 MΩ min. (at 500 VDC) between current carry parts and case					
Dielectric strength		1,000 VAC at 50/60 Hz for 1 min between current carry parts and case					
Vibration resistance		10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y and Z directions					
Shock resistance		500 m/s ² , 10 times each in X, Y and Z directions		1,000 m/s ² , 10 times each in X, Y and Z directions			
Standard and listings		IEC60529: IP67, Degree of protection EN60947-5-2: EMC UL (CSA) [E196555] (See note 3.)					
Connection method		-WP models: Pre-wired models (Standard length: 2 m) -M1 models: M12 4-pin connector models -M5 models: M8 3-pin connector models					
Weight (packaged)	Pre-wired model	Approx. 65 g		Approx. 85 g			
	M12 connector model	M12 connector models: Approx. 20 g M8 connector models: Approx. 15 g		Approx. 35 g			
Material	Case	Stainless steel or brass-nickel plated		Brass-nickel plated			
	Sensing surface	PBT					
	Cable	PVC					
	Clamping nut	Brass-nickel plated					

Note 1. The response frequency is an average value. Measurement conditions are as follows: standard target, a distance of twice the standard target distance between targets, and a setting distance of half the sensing distance.

2. When using any model at an ambient temperature between -40°C and -25°C and a power voltage between 30 and 32 VDC, use a load current of 100 mA max.,

3. UL (CSA) [E196555]: Use class 2 circuit only.

NPN Output

Operation mode	Model	Timing chart	Output circuit
NO	E2A-@@-C1	<p>The timing chart illustrates the relationship between the sensing distance of the proximity sensor and its output status. The vertical axis represents the sensing distance in percent, ranging from 0% to 100%. The horizontal axis represents time. The 'Sensing object' is positioned at the 100% sensing distance. The 'Proximity Sensor' is shown with its main circuits. The 'Yellow indicator' and 'Control output' signals are plotted. Both signals are OFF until the sensing distance reaches 100%, at which point they both switch ON. The 'Control output' signal remains ON until the sensing distance returns to 0%, at which point it switches OFF. The 'Yellow indicator' signal remains ON until the sensing distance drops below 100%, at which point it switches OFF.</p>	<p>The output circuit diagram shows the internal logic of the sensor. It includes the 'Proximity Sensor main circuits', a relay coil connected to terminal 1 (Brown), and a load connected to terminal 2 (Black). A diode is connected between terminal 2 and ground (0 V). A switch is connected between terminals 1 and 2. A yellow LED is connected between terminal 3 (Blue) and ground (0 V). A control output terminal (labeled '(See note 1.)') is also connected between terminals 1 and 2.</p> <p>Note 1: With M8 connector models, there is no output reverse polarity protection diode.</p> <p>M12 Connector Pin Arrangement (See note 2.)</p> <p>M8 Connector Pin Arrangement</p> <p>Note 2: Terminal 2 of the M12 connector is not used.</p>
NC	E2A-@@-C2	<p>The timing chart for the NC operation mode is identical to the one for NO, showing the same logic for the 'Yellow indicator' and 'Control output' signals based on the sensing distance relative to the rated sensing distance.</p>	<p>The output circuit diagram for NC is similar to the NO circuit but includes a diode connected between terminal 2 and ground (0 V) to provide reverse polarity protection. The M12 and M8 connector pin arrangements are also shown.</p> <p>Note 1: With M8 connector models, there is no output reverse polarity protection diode.</p> <p>M12 Connector Pin Arrangement (See note 2.)</p> <p>M8 Connector Pin Arrangement</p> <p>Note 2: Terminal 4 of the M12 connector is not used.</p>

Precautions

Safety Precautions

Power Supply

Do not impose an excessive voltage on the E2A, otherwise it may be damaged. Do not impose AC current (100 to 240 VAC) on any DC model, otherwise it may be damaged.

Load Short-circuit

Do not short-circuit the load, or the E2A may be damaged.

The E2A's short-circuit protection function will be valid if the polarity of the supply voltage imposed is correct and within the rated voltage range.

Wiring

Be sure to wire the E2A and load correctly, otherwise it may be damaged.

Connection with No Load

Be sure to insert loads when wiring. Make sure to connect a proper load to the E2A in operation, otherwise it may damage internal elements.

Do not expose the product to flammable or explosive gases.

Do not disassemble, repair, or modify the product.

Correct Use

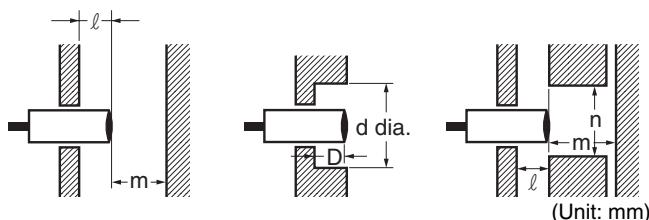

Designing

Power Reset Time

The Proximity Sensor is ready to operate within 100 ms after power is supplied. If power supplies are connected to the Proximity Sensor and load respectively, be sure to supply power to the Proximity Sensor before supplying power to the load.

Effects of Surrounding Metal

When mounting the E2A within a metal panel, ensure that the clearances given in the following table are maintained.

Type	Dimension	M8	M12	M18	M30	
					Short barrel	Long barrel
Shielded	I	0	0	0 (See note 1.)	0 (See note 2.)	
	m	4.5	12	24	45	
	d	---	---	27	45	
	D	0	0	1.5	4	
	n	12	18	27	45	
Non-shielded	I	12	15	22	30	40
	m	8	20	48	70	90
	d	24	40	70	90	120
	D	12	15	22	30	40
	n	24	40	70	90	120

Note 1. In the case of using the supplied nuts.

If true flush mounting is necessary, apply a free zone of 1.5 mm.

2. In the case of using the supplied nuts.

If true flush mounting is necessary, apply a free zone of 4 mm.

Power OFF

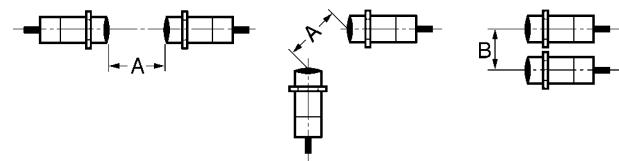

The Proximity Sensor may output a pulse signal when it is turned OFF. Therefore, it is recommended that the load be turned OFF before turning OFF the Proximity Sensor.

Power Supply Transformer

When using a DC power supply, make sure that the DC power supply has an insulated transformer. Do not use a DC power supply with an auto-transformer.

Mutual Interference

When installing two or more Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

(Unit: mm)

Type	Dimension	M8	M12	M18	M30	
					Short barrel	Long barrel
Shielded	A	20	30	60	110	
	B	15	20	35	70	
Non-shielded	A	80	120	200	300	300
	B	60	100	120	200	300

Wiring

High-tension Lines

Wiring through Metal Conduit:

If there is a power or high-tension line near the cable of the Proximity Sensor, wire the cable through an independent metal conduit to prevent against Proximity Sensor damage or malfunctioning.

Cable Extension

Standard cable length is less than 200 m.

The tractive force is 50 N.

Mounting

The Proximity Sensor must not be subjected to excessive shock with a hammer when it is installed, otherwise the Proximity Sensor may be damaged or lose its water-resistivity.

Do not tighten the nut with excessive force. A washer must be used with the nut.

Type	Torque
M8	Stainless steel type 9 Nm
	Brass type 4 Nm
M12	30 Nm
M18	70 Nm
M30	180 Nm

Maintenance and Inspection

Periodically perform the following checks to ensure stable operation of the Proximity Sensor over a long period of time.

- Check for mounting position, dislocation, looseness, or distortion of the Proximity Sensor and sensing objects.
- Check for loose wiring and connections, improper contacts, and line breakage.
- Check for attachment or accumulation of metal powder or dust.
- Check for abnormal temperature conditions and other environmental conditions.
- Check for proper lighting of indicators (for models with a set indicator.)

Never disassemble or repair the Sensor.

Environment

Water Resistivity

Do not use the Proximity Sensor underwater, outdoors, or in the rain.

Operating Environment

Be sure to use the Proximity Sensor within its operating ambient temperature range and do not use the Proximity Sensor outdoors so that its reliability and life expectancy can be maintained. Although the Proximity Sensor is water resistive, a cover to protect the Proximity Sensor from water or water-soluble machining oil is recommended so that its reliability and life expectancy can be maintained.

Do not use the Proximity Sensor in an environment with chemical gas (e.g., strong alkaline or acid gasses including nitric, chromic, and concentrated sulfuric acid gases).

Inrush Current

A load that has a large inrush current (e.g., a lamp or motor) will damage the Proximity Sensor, in which case connect the load to the Proximity Sensor through a relay.

<SUITABILITY FOR USE>
