(Maximum parameters are measured in a vacuum 1.3P)

Note-6 The solder melting point of thermoelectric module

Note-7 Recommended maximum compression (not destruction limit)

2 -2 Recommendations:

- maximum temperature for short time: 200 °C
- operation temperature up to 150°C for long lifetime
- high power cycling applications in ON/OFF mode
- recommended operation current not higher than 0.7 of I_{max}
- preferable application; thermal management / cycling at high temperatures
