Specifications:

Opto Inputs (24 V)

Number	ME-8100A: 16; ME-8100B: 32. Switching frequency max. 6 kHz. Isolation up to 1 kV. Level typ. 24 V
Operating modes	Simple read. Bit pattern comparator: Programmable, 1x [model A] or 2x [model B] 16 bit wide, interrupt on comparison positive. Bit change: A bit selected/set in the mask register will generate an interrupt, whenever the corresponding input changes its status. If more than one bit is set in the mask register, an interrupt will be generated, if at least one of the related inputs changes its status
