

CONDUCTIVE CLOSED-CELL PIN-INSERTION FOAM

L2610

- Cross-linked, closed-cell polyethylene foam
- Excellent chemical and physical stability, good for long term storage
- Ideal pin-insertion and pin-retention characteristics
- Water absorption < 0.5% vol per ISO 2896
- $R_v, R_s = 10^3$ to $10^5 \Omega$, density 60kg/m^3
- Supplied in 7mm thick sheets as below or cut to size

LABELS

EN100015 and IEC 1340-5-1 require all ESDS to be labelled. The latter standard, to be published in 1997, introduces an additional symbol (see page 11) which serves to label ESD packaging materials and EPA compatible equipment.

We offer self-adhesive paper labels, printed black on yellow, with either symbol in several sizes. All are supplied on rolls of 1000 labels.

ANTISTATIC PACKING TAPE

L5411

- Does not generate electrostatic charge.
- Suitable for use in EPA.
- Printed yellow with black logo and text to EN 100 015

- Paper tape with water-based acrylic adhesive
- $T_{1000} < 2$ sec at 25% rH
- Tape width 50mm, roll length 66m
