

M68DEMO908QT4 : Demonstration Board

The 68HC908QT4 Demonstration board comes with everything you need to begin code development with Motorola's HC08 Q-Family of MCUs. It is available complete with Metrowerks CodeWarrior™ Development Studio Special Edition for HC08 to modify demo code or develop new code using ASM or C. The evaluation board allows for real-time source-level debugging of your code and programming of the device's Flash memory; all with no additional hardware.

M68DEMO908QT4 Features

- Evaluation board with 8-pin 68HC908QT4
- Learn the QT MCU Family quickly with tutorial and demonstration code including A/D, timer, PWM, and keyboard interrupt
- Modify demo code or develop new code for the QT4 in assembly or C using free CodeWarrior™ Development Suite for HC08, Special Edition
- Program and debug code using free CodeWarrior Development Studio for HC08, Special Edition through DB9 serial port and included RS232 serial cable
