

Wiha MagicSpring.

Holds TORX® - and TORX PLUS® Screws Securely in Place.

No more annoying and time-consuming hunting around for TORX® or TORX PLUS® screws that have apparently vanished into thin air. With Wiha's ingenious new tool, the MagicSpring, TORX® or TORX PLUS® screws* are kept firmly where you want them. The highlight of the "MagicSpring" tools is the stainless steel "magical" retaining spring that, together with a thin cover disc, is laser-welded to the tip of the blade.

This completely new innovation acts as a clamp between tool and TORX® or TORX PLUS® screw, so that the latter is firmly gripped by the tip of the blade. The new tools are especially beneficial when turning particularly small screws or when turning screws in areas that are difficult to access. Simply place the screw on the tip of the blade and start to turn. No more screws will fall to the ground or disappear between components.

* TORX® or TORX PLUS® screws manufactured acc. to Camcar Textron specifications.

Thanks to Wiha's MagicSpring, inserting and removing TORX® and TORX PLUS® screws is safe and easy.

The retaining spring is a completely new technical solution that, together with a thin cover disc, is laser-welded to the tip of the blade.

The "MagicSpring" integrated into the tip of the blade acts as a clamp between tool and TORX® or TORX PLUS® screw so that the latter is gripped firmly.

As the clamping action is purely mechanical, MagicSpring also gets a firm grip on TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium.

Wiha MagicSpring:

- MagicSpring retaining spring made of stainless steel gets a firm hold on every TORX® or TORX PLUS® screw
- No more annoying searching for dropped screws
- Ideal for areas that are difficult to access
- Made of high-quality materials in the renowned Wiha quality
- Also suitable for TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium

TORX® MagicSpring L-Keys and Sets.

371R TORX® L-Keys. With MagicSpring.

Blade: Chrome-vanadium steel, through hardened, manganese-phosphated.
