

High performance size 23 hybrid stepper motors HSX series

The high performance 23HSX series hybrid stepper motors conform to the international NEMA standard, and provide 200 steps/rev when used with full step drives or 400 steps per revolution in the preferred half step drive mode.

Features:

- High energy Neodymium magnets for increased performance
- 50% more torque than conventional hybrid types
- Choice of single or double shaft options
- Optional encoder or parking brake.
- High quality & Economical prices
- Available with a choice of precision planetary gearheads for increased torque and resolution at reduced speed.
- 8 leads provide the choice of Uni-polar or Bi-polar operation
- Non-standard customised executions available to special order
- Wide range of matched drives and control modules enable complete systems to be economically constructed based on 'in-service proven' technology.

Dimensions mm

Mechanical Specification: 1.8 degree high performance stepper motors

motor type	length 'L' mm	Shaft diameter 'Ds' Mm	number of leads	mass Kg	Uni-polar Holding Torque Ncm	Bi-polar Holding Torque Ncm	Rotor Inertia Kgcm ²
23HSX-102	41	6.35	8	0.5	37	47	0.077
23HSX-202 23HSX-206	55	6.35	8	0.7	75	98	0.22
23HSX-306	78.5	8.0	8	1.0	125	163	0.34

Electrical Specification:

Uni-polar operation

motor type	Resistance per phase ohms	Current per phase Amps	Inductance per phase mH
23HSX-102	4.6	1.0	4.6
23HSX-202	6.2	1.0	8.8
23HSX-206	0.7	3.0	0.9
23HSX-306	1.1	3.0	1.7

Bi-polar operation

Current / phase Series connection Amps	Current / phase Parallel connection Amps
0.7	1.4 max.
0.7	1.4 max.
2.1	4.2 max.
2.1	4.2 max.

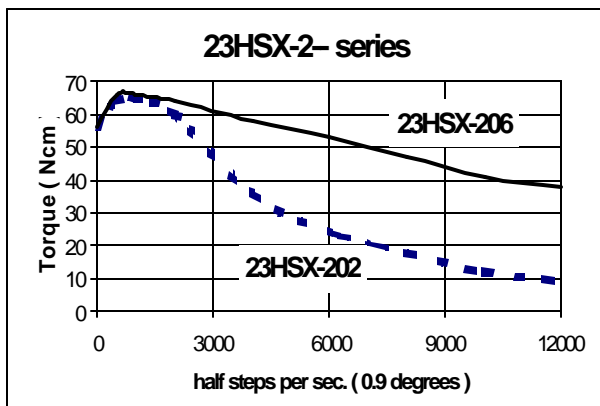

Note Rear shaft may be specified by adding 'E' to part number EXAMPLE: 23HSX-206E

23HSX stepper motor lead colours:

Motor Types	lead or terminal identification							
Lead identity	1	1'	2'	2	3	3'	4'	4
23HSX 102 23HSX 202 23HSX 206 23HSX 306	Red	Red/ White	Yellow/ White	Yellow	Orange	Orange/ White	Brown/ White	Brown

Typical performance

Performance Curves Bi-polar operation, coils in parallel

Motor	Current Per phase (Amps)	Rail Voltage (Vdc)
23HSX-102	1.4	36
23HSX-202	1.4	36
23HSX-206	4.0	70
23HSX-306	4.0	70

High performance size 34 hybrid stepper motors HSX series

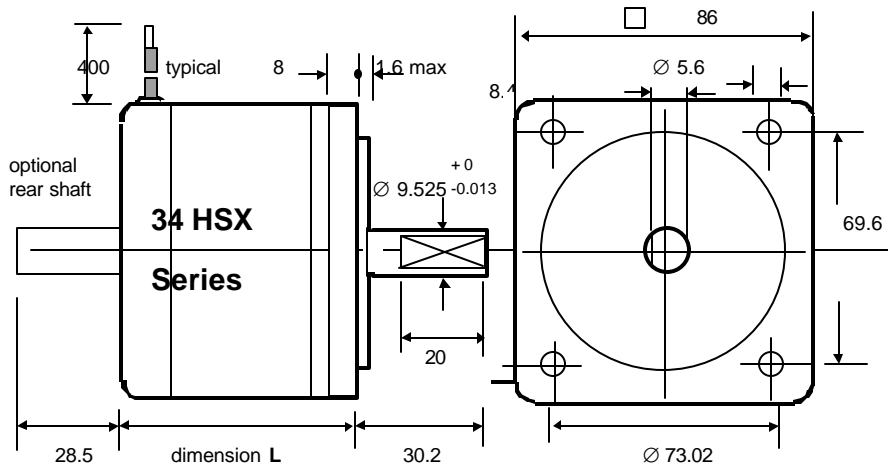

The high performance 34 HSX series hybrid stepper motors conform to the international NEMA standard, and provide 200 steps /rev when used with full step drives or 400 steps per revolution in the preferred half step drive mode.

Features:

- High energy Neodymium magnets for increased performance
- 50% more torque than conventional hybrid types
- Choice of single or double shaft options
- Optional encoder or parking brake.
- High quality & Economically prices
- Available with a choice of precision planetary gearheads for increased torque and resolution at reduced speed.
- 8 leads provide the choice of Uni-polar or Bi-polar operation
- Non-standard customised executions available to special order
- Wide range of matched drives and control modules enable complete systems to be economically constructed based on 'in-service proven' technology.

Hybrid stepper motors with integral encoders HSX series

The **23HSX** & **34HSX** stepper motors are available fitted with dual track encoders to provide feedback of motor position. Motors thus equipped are therefore ideally suited for use with motion systems employing closed loop controllers such as PM341.

Two encoders types **CI** & **RI** series are available, which may be specified with the **23HSX** motors & **34HSX** types as shown below. Since the controllers monitor each signal transition on each of the encoder's A & B tracks, a line count of 100 ppr provides a measuring resolution of 400 steps/rev while a 500 ppr encoder is used with 2000 step per rev. microstepping drives.

Where customers require an encoder for use with control systems not supplied by Mclennan and which require alternative line counts, the model '**RI**' encoder is available with any line count required up to a maximum value of 2,000 ppr. resulting in a measuring resolution of 8,000 steps/rev. .

Encoder signals:

The **CI...T** encoder provides a 5V TTL output signal and is suitable for instrumentation applications where the encoder is to be sited no further than 5 meters from the measuring electronics.

The **CI...L** & **RI ...L** encoders are equipped with a 5V line driver output suitable for industrial installations where the motor-encoder may be up to 50 meters away from the measuring electronics providing the encoder lead is correctly screened.

Dual track output	pulses/rev	index	motor steps/rev	motor type	Encoder type
A B	100	-	400	23HS...	CI 100T
