

# AM26C32 QUADRUPLE DIFFERENTIAL LINE RECEIVER

SLLS104I – DECEMBER 1990 – REVISED SEPTEMBER 2004

- Meets or Exceeds the Requirements of ANSI TIA/EIA-422-B, TIA/EIA-423-B, and ITU Recommendation V.10 and V.11
- Low Power,  $I_{CC} = 10 \text{ mA Typ}$
- $\pm 7\text{-V}$  Common-Mode Range With  $\pm 200\text{-mV}$  Sensitivity
- Input Hysteresis . . . 60 mV Typ
- $t_{pd} = 17 \text{ ns Typ}$
- Operates From a Single 5-V Supply
- 3-State Outputs
- Input Fail-Safe Circuitry
- Improved Replacements for AM26LS32
- Available in Q-Temp Automotive
  - High Reliability Automotive Applications
  - Configuration Control/Print Support
  - Qualification to Automotive Standards

## description/ordering information

The AM26C32 is a quadruple differential line receiver for balanced or unbalanced digital data transmission. The enable function is common to all four receivers and offers a choice of active-high or active-low input. The 3-state outputs permit connection directly to a bus-organized system. Fail-safe design specifies that if the inputs are open, the outputs always are high.

The AM26C32 devices are manufactured using a BiCMOS process, which is a combination of bipolar and CMOS transistors. This process provides the high voltage and current of bipolar with the low power of CMOS to reduce the power consumption to about one-fifth that of the standard AM26LS32, while maintaining ac and dc performance.

The AM26C32C is characterized for operation from 0°C to 70°C. The AM26C32I is characterized for operation from –40°C to 85°C. The AM26C32Q is characterized for operation from –40°C to 125°C. The AM26C32M is characterized for operation over the full military temperature range of –55°C to 125°C.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

 **TEXAS  
INSTRUMENTS**

## QUADRUPLE DIFFERENTIAL LINE RECEIVER

SLLS104I – DECEMBER 1990 – REVISED SEPTEMBER 2004

electrical characteristics over recommended ranges of  $V_{CC}$ ,  $V_{IC}$ , and operating free-air temperature (unless otherwise noted)

PARAMETER		TEST CONDITIONS		MIN	TYP†	MAX	UNIT
$V_{IT+}$	Differential input high-threshold voltage	$V_O = V_{OH(min)}$ , $I_{OH} = -440 \mu A$	$V_{IC} = -7 V$ to $7 V$			0.2	V
			$V_{IC} = 0$ to $5.5 V$			0.1	
$V_{IT-}$	Differential input low-threshold voltage	$V_O = 0.45 V$ , $I_{OL} = 8 mA$	$V_{IC} = -7 V$ to $7 V$			$-0.2\ddagger$	V
			$V_{IC} = 0$ to $5.5 V$			$-0.1\ddagger$	
$V_{hys}$	Hysteresis voltage ( $V_{IT+} - V_{IT-}$ )				60		mV
$V_{IK}$	Enable input clamp voltage	$V_{CC} = 4.5 V$ ,	$I_I = -18 mA$			-1.5	V
$V_{OH}$	High-level output voltage	$V_{ID} = 200 mV$ ,	$I_{OH} = -6 mA$	3.8			V
$V_{OL}$	Low-level output voltage	$V_{ID} = -200 mV$ ,	$I_{OL} = 6 mA$		0.2	0.3	V
$I_{OZ}$	Off-state (high-impedance state) output current	$V_O = V_{CC}$ or GND			$\pm 0.5$	$\pm 5$	$\mu A$
$I_I$	Line input current	$V_I = 10 V$ ,	Other input at $0 V$			1.5	mA
		$V_I = -10 V$ ,	Other input at $0 V$			-2.5	
$I_{IH}$	High-level enable current	$V_I = 2.7 V$				20	$\mu A$
$I_{IL}$	Low-level enable current	$V_I = 0.4 V$				-100	$\mu A$
$r_i$	Input resistance	One input to ground		12	17		k $\Omega$
$I_{CC}$	Supply current	$V_{CC} = 5.5 V$			10	15	mA

† All typical values are at  $V_{CC} = 5 V$ ,  $V_{IC} = 0$ , and  $T_A = 25^\circ C$ .

‡ The algebraic convention, in which the less positive (more negative) limit is designated minimum, is used in this data sheet for common-mode input voltage.

switching characteristics over recommended ranges of operation conditions,  $C_L = 50 pF$  (unless otherwise noted)

PARAMETER	TEST CONDITIONS	AM26C32C AM26C32I			AM26C32Q AM26C32M			UNIT	
		MIN	TYP†	MAX	MIN	TYP†	MAX		
$t_{PLH}$	Propagation delay time, low- to high-level output	See Figure 1	9	17	27	9	17	27	ns
$t_{PHL}$	Propagation delay time, high- to low-level output		9	17	27	9	17	27	
$t_{TLH}$	Output transition time, low- to high-level output	See Figure 1		4	9		4	10	ns
$t_{THL}$	Output transition time, high- to low-level output			4	9		4	9	
$t_{PZH}$	Output enable time to high level	See Figure 2		13	22		13	22	ns
$t_{PZL}$	Output enable time to low level			13	22		13	22	
$t_{PHZ}$	Output disable time from high level	See Figure 2		13	22		13	26	ns
$t_{PLZ}$	Output disable time from low level			13	22		13	25	

† All typical values are at  $V_{CC} = 5 V$ ,  $T_A = 25^\circ C$ .

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Green (RoHS & no Sb/Br):** TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
