# 110 Series Digital Multimeters

#### True-rms

### Sometimes smaller is better

When size is important, the 110 Series are clearly the best choice. These little meters pack more features than many multimeters twice their size. True RMS AC measurements, a 6000count display and min-max-average recording are standard with all models. And the capability to measure frequency and capacitance make them really powerful.

The compact case has a removable protective holster and a battery door to allow easy replacement of the batteries.

#### **Safety Conformance**

All inputs are protected to EN61010-1 CAT III 600V. UL, CSA, TÜV listed and VDE pending.
