**Common Point Grounding System for mat and wrist strap**

**Codes J 64 55, 56 and 58**

## **Description**

The common point grounding system (CPGS) will ground a static dissipative work surface and provide two 4 mm banana sockets for wrist straps to be connected. The device will snap on to a 10 mm press stud on the mat, whilst the other end of the cord is connected to earth facility. There is a one megohm safety resistor incorporated into the device.

The Vermason CPGS is available with a 4 mm banana plug or a crocodile clip at the termination to the cord.
