

CIRCULAR FC® T5 (16MM) LAMPS CIRCULAR FLUORESCENTS

Circular FC® lamps with a tube diameter of 16mm (T5) may only be operated with QUICKTRONIC® QT-FC ECGs with cut-off technology. Circular FC® lamps and modern architecture go together so well.

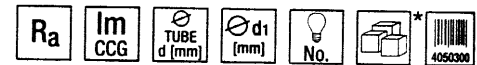

Lamp reference

CIRCULAR FLUORESCENT LAMPS

Electronic control gear such as the QUICKTRONIC® for OSRAM DULUX® L is suitable for circular lamps (see Section 7). Because of their shape, these fluorescent lamps distribute the light very evenly.
