Opto Isolator - RS232

- Complete electrical isolation
- Up to 9600 baud
- 10 kv breakdown isolators
 An in-line opto isolator for protecting
- Allows equipment to be interconnected where local ground potentials differ at either end of the connection
- Typical applications include connecting equipment in electrically noisy environ-ments and blocking computer generated

- noises from sensitive instruments

 Fitted at one end with a 9 way male 'D' connector and with a 9 way female 'D' connector at the other
- Supplied in a rugged machined plastic housing
 The device will run off the signal lines, however, power can be applied seperately if required (8 to 25 volts but the voltage must be higher than the peak signal voltage)
- See cables below for connection to device
