## DESCRIPTION

The 1800 Series of inductors are particularly suited to use with a wide variety of switching regulators. Offering high current handling with a low mounting height, the devices are ideal where space is at a premium.

## All specifications typical at $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$

1 Maximum DC current occurs when either the inductance falls to $90 \%$ of its nominal value or when its temperature rise reaches $30^{\circ} \mathrm{C}$, whichever is sooner.
