Black Conductive ESD Protective Bottles

Features:

- **Permanently Black Conductive HDPE**
Provides maximum conductivity for required circumstance
- **Low Tribo-Charging**
Will not easily produce a charge when moved or lifted
- **Low Internal Contamination**
The conductive in the plastic will not readily contaminate contents of bottle
- **One Handed Operation**
Perfect for cleaning with swabs and brushes

Specs:

- **Resistance Point to Point (RTT)**
 10^2 to 10^6

| P/N | Description |
|-------|--|
| 51050 | One touch, black, conductive, 177 mL |
| 51051 | Pure touch, black, conductive, 177 mL |
| 51052 | One touch, black, conductive, locking cap, 177 mL |
| 51053 | Pure touch, black, conductive, locking cap, 177 mL |

51050, 51051,
51052, 51053

51054, 51055,
51056, 51057

Description

Charleswater Europe's ESD Fingertip Pumps are dispensers that can be used for liquids needed at a workbench. They are available in either black conductive or blue dissipative HDPE 177mL bottles. The One-Touch Pump dispenses only the desired fluid into the reservoir in the cap. the Pure Touch Pump also inhibits cross-contamination by preventing fluids from returning into the dispenser. These fingertip pumps are antistatic and low tribocharging for minimal charge generation. The stainless steel pump is non-corrosive and the precision valve prevents contamination and spills.
