

58000

Wall mounted steel enclosures

The IP55 58000 series is a low cost solution for general applications where impact resistance may also be a consideration. Sarel steel enclosures have a superior finish of polyester powder paint suitable for all normal conditions.

Applications

- General protection of electrical and other equipment against impact and the ingress of dust and liquids.

Features and benefits

- Overall sheet steel construction.
- Epoxy powder coated to RAL7032.
- Earth points on enclosure body & door.
- IP55 protection as standard.
- Polyurathane gasketed.

Also suitable for commercial applications
