### MOUNTING

The capacitors are designed for automatic placement onto printed-circuit boards.

Optimum dimensions of soldering pads depend amongst others on soldering method, mounting accuracy, print lay-out and/or adjacent components.

For recommended soldering pad dimensions, refer to Fig.3 and Table 3.

### Soldering

Soldering conditions are defined by the curve, temperature versus time, where the temperature is that measured on the soldering pad during processing.

For maximum conditions refer to Fig.4.

Any temperature versus time curve which does not exceed the specified maximum curves may be applied.

AS A GENERAL PRINCIPLE,  
TEMPERATURE AND DURATION  
SHALL BE THE **MINIMUM**  
NECESSARY REQUIRED TO ENSURE  
GOOD SOLDERING  
CONNECTIONS.
