

User Guide

BT DIVERSE 6410

Welcome...

to your BT Diverse 6410 digital cordless telephone

- Download pictures and ring tones from your PC.
- Directory lets you store up to 200 names and numbers for easy dialling.
- Copy the whole directory or individual entries to and from your mobile phone SIM card.
- Headset lets you keep your hands free for other tasks while making and receiving calls.
- Send and receive SMS text messages.
- Caller Display lets you see who's calling and your phone stores details of the last 30 callers in a Calls list (feature requires subscription to a Caller Display service).
- Expandable system. You can have up to 6 GAP compatible handsets registered to your BT Diverse 6410 base. Make internal calls between two handsets while a third is on an external call.
- Digital call clarity with up to 300m range outdoors and up to 50m indoors (in ideal conditions).

This User Guide provides you with all the information you need to get the most from your phone.

You must first set up your phone before you can use it. This doesn't take long as it is easy to do. Just follow the simple instructions on the next few pages.

■ **Need help?**

If you have any problems setting up or using your BT Diverse 6410, contact the Helpline on **0870 240 3962** or email bt.helpdesk@vtecheurope.com

Alternatively, you may find the answer in 'Help' at the back of this guide.

■ **Hearing aid?**

Please note that the BT Diverse 6410 works by sending radio signals between the base and handset. These signals may interfere with some hearing aids, causing a humming noise.

Getting started

Location

You need to place your BT Diverse 6410 base close enough to a mains power and telephone socket so that the cables will reach.

Make sure it is at least 1 metre away from other electrical appliances to avoid interference.

Your BT Diverse 6410 works by sending radio signals between the handset and base. The strength of the signal depends on where you site the base. Putting it as high as possible ensures the best signal.

Setting up

1. Plug the mains power adaptor into the power socket on the underside of the base. Plug the other end into the mains socket. The Power/In Use and message indicators light up.

WARNING

Do not place your BT Diverse 6410 in the bathroom or other humid areas.

Handset range

The BT Diverse 6410 has a range of 300 metres outdoors when there is a clear line of sight between the base and the handset. When there is no clear line of sight between the base and the handset, e.g. base indoors and handset either indoors or outdoors, the range could be reduced to 50 metres. Thick stone walls can severely affect the range.

Signal strength

The  symbol on your handset screen indicates when you are in range. When you are out of range, it flashes and the screen displays SEARCHING and there is a beep, you are out of range.

IMPORTANT

Do not connect the telephone line until at least one of the handsets is fully charged.

The base station must be plugged into the mains power at all times.

8 Getting started

Battery low warning

When the batteries need recharging, the handset beeps and the display shows .

Battery level

The battery symbol shows the current level.

Battery performance

To keep your batteries in the best condition, leave the handset off the base for a few hours at a time (after the initial 16 hour charge).

Running the batteries right down at least once a week will help them last as long as possible.

On a full charge, your BT Diverse 6410 handset gives you up to 10 hours talk time or up to 30 hours standby. Standby time is increased if set to battery save mode, see [page 58](#) for details.

The charge capacity of rechargeable batteries will reduce with time as they wear out, giving the handset less talk/standby time. Eventually they will need to be replaced.

Batteries and handset may become warm during charging. This is normal.

2. Batteries will come inserted in the battery compartment. Pull the plastic tag as instructed to activate the batteries.

3. Charge the handset batteries for at least 16 hours by placing the handset on the base. The screen shows the battery icon filling up.
4. Connect the telephone line cord to the base and plug the other end into the wall socket.

Your BT Diverse 6410 is ready for use.

Providing you have subscribed to your network's Caller Display service, the day and time is automatically set when you receive your first incoming call.

However, you can also set the day and time manually, *see page 67*.

BT Diverse 6410 multiple pack owners only

Location

You need to place your BT Diverse 6410 charger close enough to a mains power socket so that the cable will reach.

Setting up the charger

1. Plug the power adaptor cable into the underside of the charger.

Under no circumstances use non-rechargeable batteries. Only use NiMH rechargeable batteries with a recommended capacity of 750mAh. Using inappropriate batteries will invalidate your guarantee and may damage the telephone.

Helpline

If you are having any difficulties setting up or using your BT Diverse 6410, please call the BT Diverse Helpline on 0870 240 3962 or email bt.helpdesk@vtecheurope.com

10 Getting started

2. Plug the power adaptor into the mains wall socket and switch the power on.
3. The batteries are already inserted in the battery compartment. Pull the plastic tag as instructed to activate the batteries.
4. Place the handset in the charger and charge the handset for at least 16 hours.

Follow instructions on page 68 for registering additional handsets to the BT Diverse 6410 base.

26 Using your phone

If a copied name has more than 16 characters, your BT Diverse 6410 will store the first 16 characters only.

If the copied entry has more than 24 digits, your BT Diverse 6410 will store the first 24 digits only.

If you have problems copying directory entries from your SIM onto the BT Diverse 6410 place the SIM back into your mobile and confirm that the directory entries are stored on the SIM and not within the mobile handset directory. If this is not the case then you will need to copy the entries from your mobile handset directory onto the SIM. Refer to your mobile user guide for details. Note: Sometimes the mobile handset directory entries will appear differently when they are copied to the SIM, with the name being appended with a number, e.g. Tom 1.

Delete the entire directory

1. Press **NAMES** then press **OPTIONS**.
2. Scroll **DOWN** to **DELETE ALL** and press **OK**.
3. **DELETE ALL ENTRIES?** is displayed. Press **YES** to delete or **NO** to cancel.
4. Press  to return to standby.

Copy SIM

Copy entries to and from compatible mobile phone SIM cards. Copied entries are added to any existing entries that have been stored. You can accept or reject each entry until your directory is full.

Copy to or from a SIM card

1. Insert the SIM card into the SIM READER slot on the base.

2. Press **NAMES** then **OPTIONS**.
3. Scroll **DOWN** to **SIM COPY** and press **OK**.

4. If required, enter the SIM Card PIN and press **OK**.
5. The screen displays SIM TO PHONE/PHONE TO SIM. If copying to the SIM Card, scroll **DOWN** to highlight PHONE TO SIM.
6. Press **OK**. The list of directory names is displayed. Scroll **UP** or **DOWN** to the entry you want and press **OPTIONS**.
7. Screen shows COPY ENTRY/COPY ALL. Use **UP** or **DOWN** to highlight the option you want and press **OK**.
8. If selecting a single entry, the screen shows NAME COPIED. You can now select another entry. If copying all entries, each entry is displayed and copied until all entries are copied or the directory is full.

Internal calls

If you have more than one handset registered to your base, you can make internal calls and transfer calls between handsets.

Call another handset

1. Press **Int** . If you have two handsets, the other handset will ring. If you have more handsets, all available handsets are displayed. Scroll **DOWN** to highlight the handset you want and press **OK**.

If you enter the wrong PIN twice, SIM PIN ERROR is displayed and the screen returns to standby. Check that you have the right SIM PIN. If you cannot find it, contact your mobile phone network for help.

If handset directory is empty, the screen only shows SIM TO PHONE.

2. If the other handset is making an external call, the screen shows NOT AVAILABLE.

Transfer a call to another handset

1. During an external call, press . Your caller is put on hold.

IMPORTANT

You must subscribe to your Network Provider's Caller Display service so that you can use SMS text messaging. A quarterly fee may be payable, please contact your network provider for more details.

When you are using SMS text messaging you must not withhold your telephone number or the service will not allow you to connect.

You may also send messages to landline phones that are NOT SMS compatible. Messages to non-compatible lines will be connected to voice text and delivered in spoken words to the telephone as a call. Please note that the conversion can translate common abbreviations and smileys etc, but to ensure maximum clarity of message deliver, abbreviations etc should be used sparingly.

Welcome to the BT SMS Service on your BT Diverse 6410. The service is provided by BT. Your BT Diverse 6410 can send and receive SMS messages from participating mobile networks and compatible landline telephones in the UK.

The fixed line SMS service is provided under BT's terms and conditions for telephone service. These can be found by visiting the BT.com website at:
<http://www.bt.com/terms/tor.htm>

Subscribe to the SMS service

When you send your first SMS text message from your BT Diverse 6410 you will automatically be registered for the service.

On receipt of your first SMS through the service, the system will send you a welcome SMS message back.

You may also register by sending the word 'Register' to 00000 upon which you will receive a confirmation message.

Cost of the fixed line service

There is no subscription charge (other than the subscription to Caller Display). Visit the BT.com website (www.bt.com) to find out how much it costs to send a SMS text message (depends upon your call package).

Send an SMS text message

3. Press **OK**. Enter the **SYSTEM PIN** (original setting 0000) and press **OK**.
4. The handset screen displays **PRESS & HOLD FIND BUTTON ON BASE**.

At the base:

5. Press *and hold* **FIND** for about 10 seconds until you hear a beep. The base is now in registration mode.

The handset screen displays **REGISTRATION IN PROGRESS**. When the handset is registered it will display the standby screen and will be assigned the next available handset number.

Select a base

On the handset:

1. Press **MENU** then scroll **DOWN** to **HANDSET SETTINGS** and press **OK**. Scroll **DOWN** to **SELECT BASE**.
2. Press **OK**. Display shows **BASE 2**, **BASE 3** etc. Scroll to the base you want and press **OK**.

De-register a handset

You can use a handset to de-register itself or any other handset from the base.

1. Press **MENU** and scroll **DOWN** to **REGISTRATION**. Then press **OK**.
2. Scroll **DOWN** to **DE-REGISTER H/SET** and press **OK**.
3. Enter the System PIN (original setting 0000) and press **OK**.
4. Select handset to be de-registered, press **OK**.
DE-REGISTER HANDSET X? is displayed. Press **YES** to confirm or **NO** to cancel.
5. Display shows **HANDSET X DE-REGISTERED**.
6. Press  to return to standby or **BACK** to go one step back in the menu.

Help

Handset not registering

- Check that the base is plugged into the mains power and switched on.
- Check that there are charged batteries in the handset and fitted correctly.

Forgotten your PIN number

- Try entering the default PIN = 0000. If you have changed the number and cannot remember it, contact the BT Diverse Helpline on **0870 240 3962** or email bt.helpdesk@vtecheurope.com

No display

- Check that the handset batteries are charged. If necessary, replace the batteries.

Nothing happens when you press any button

- Is the keylock switched on? If so, press **UNLOCK** then  to switch keylock off.

No connection between handset and base

- You may be out of range of the base. Move closer.

Handset on the base does not charge

- Make sure the handset is placed properly on the base. When charging, the battery symbol is shown filling up.

Handset does not ring

- Check that the batteries are inserted correctly.
- Check that the handset ringer has not been switched off, *see page 15*.

Your caller cannot hear you

- Secrecy is switched on. Press the secrecy **OFF** option button to speak to your caller again.

Incoming caller's number is not displayed even though you have Caller Display

- Caller has to allow their number to be sent. It has been withheld or is unavailable.

Possible problems with SMS

- SMS messages cannot be sent and screen displays MESSAGE SENDING FAILED.
- The base station power supply or telephone line cord might not be properly connected. Check that the base station power supply is plugged into the mains socket and switched on and that the telephone is plugged into the telephone wall socket.
- There might be a fault on the line. Check your telephone line is working properly.
- You might have deleted the server number in error. *See pages 44-45* for instructions on how to enter the number.
- More than one SMS product is plugged into the line. Remove other products.

Cannot send text

- Check service centre number is correct including 1470P prefix.

Cannot receive text

- Check service centre number is correct.
- Ensure you have subscribed to a Caller Display service and that it is active. You can check this by noting if your phone displays your caller's number when you receive an incoming call.

Handset is registered to the SMS service and text has previously been sent and received but you are now only receiving incoming messages.

- This may be due to your handset being de-registered at the text service centre. All you need to do is type Register and send it to 00000. You will receive a confirmation message back. This assumes that your Caller Display service is active and working on your line.
- Messages sent to 00000 are not charged for.

Further help and advice for SMS queries on BT lines:

- BT Residential customers – call 151, choose option 2, when prompted by the Fault Management Service select option 2, enter your phone number on the handset and wait to speak to a customer adviser.
- BT Business Customers – call 152, choose option 2, when prompted by the Fault Management Service select option 2, enter your phone number on the handset and wait to speak to a customer adviser.

74 Help

- For other telephone service providers please contact their customer services.

Other functions and services available from the SMS service

- By sending the following commands to the BT text self administration facility you can control functions and capabilities in your SMS phone and the way messages are handled.
- Press **MENU**. Press **OK** to WRITE MESSAGE. Type in the following commands (depending upon what you want to do) and send to 00000.
- * 1 # Opt out from receiving voice text messages.
- # 1 # Turns off the opt out option.
- * 2 * Turns on permanent voice text message delivery to your phone. All incoming text is delivered as voice text.
- # 2 # Turns off permanent voice text message delivery.

If you are sending a message from a fixed line phone to another fixed line phone

- * 3 # Forces a message you send to be delivered as a voice text even though the recipient may have an SMS enabled phone and usually receives written text.
- This command is inserted at the start of the message and applies only to that message, e.g. * 3 # *'Hello I will be home late'*.

If you are sending a message from a fixed line phone and require a status report

- * 0 # Will allow a status report to be sent back to you when you have sent a message to confirm delivery.
- Place * 0 # at the start of your text message. Write the message and send it. You will receive a reply text back to your phone giving the status report for that message.

You keep hearing an error beep

- You have pressed the wrong button in a sequence. Check the prompts in the display or refer to instructions in this user guide.

General information

IMPORTANT

This equipment is not designed for making emergency telephone call when the power fails. Alternative arrangements should be made for access to emergency services.

This product is intended for connection to analogue public switched telephone networks and private switchboards in the United Kingdom.

Safety information

- Only use the power supply suitable for the BT Diverse 6410 range. Using an unauthorised power supply will invalidate your guarantee and may damage the telephone.
- For the handset, use only AAA Nickel Metal Hydride (NiMH) rechargeable batteries with a minimum of capacity of 750mAh. Never use other batteries or conventional alkaline batteries as this could lead to a short circuit or destroy the battery casing.
- If the keylock is switched on, it is NOT possible to make calls, including emergency numbers (999/112).
- Do not open the handset (except to replace the handset batteries). This could expose you to high voltages or other risks.
- Radio signal transmitted between the handset and base may cause interference to hearing aids.
- It is recommended that advice from a qualified expert be sought before using this product in the vicinity of emergency/intensive care medical equipment.
- It is recommended that if you have a pacemaker fitted you check with a medical expert before using this product.

78 General information

- Never dispose of batteries in a fire. There is a serious risk of explosion and/or the release of highly toxic chemicals.

Cleaning

- Simply clean the handset and base with a damp (not wet) cloth, or an anti-static wipe.
- Never use household polish as this will damage the product. Never use a dry cloth as this may cause a static shock.

Environmental

- Do not expose to direct sunlight.
- The handset may become warm when the batteries are being recharged. This is normal. We recommend that you do not place the product on antique/veneered wood to avoid damage.
- Do not stand your product on carpets or other surfaces which generate fibres or place it in locations preventing the free flow of air over its surfaces.
- Do not submerge any part of your product in water and do not use it in damp or humid conditions, such as bathrooms.
- Do not expose your product to fire, explosive or other hazardous conditions.
- There is a slight chance your phone could be damaged by and electrical storm. We recommend that you unplug the power and telephone line cord during an electrical storm.

Connecting to a switchboard

Switchboard compatibility

- This telephone may be connected to most types of switchboard, however in the event of any difficulties, consult your switchboard Service Provider.

Dialling mode

- Your BT Diverse 6410 is set to Tone dialling. Some switchboards may require Pulse dialling. To change the dialling mode, see Dialling mode, *page 62*.

Guarantee

Your BT Diverse 6410 is guaranteed for a period of 12 months from the date of purchase.

Subject to the terms listed below, the guarantee will provide for the repair of, or at BT's or its agent's discretion the option to replace the BT Diverse 6410, or any component thereof, (other than batteries), which is identified as faulty or below standard, or as a result of inferior workmanship or materials. Products over 28 days old from the date of purchase may be replaced with a refurbished or repaired product.

The conditions of this guarantee are:

- The guarantee shall only apply to defects that occur within the 12 month guarantee period.
- Proof of purchase is required.
- The equipment is returned to BT or its agent as instructed.

80 General information

- This guarantee does not cover any faults or defects caused by accidents, misuse, fair wear and tear, neglect, tampering with the equipment, or any attempt at adjustment or repair other than through approved agents.
- This guarantee does not affect your statutory rights.

Within the 12 month guarantee period:

If you experience difficulty using the product, prior to returning your product, please read the Help section beginning on *page 71* or contact the BT Diverse Helpdesk for assistance on **0870 240 3962** or email bt.helpdesk@vtecheurope.com. The helpline is open from 9.00am-5.30pm Mon-Fri and 9.30am-2.30pm Saturdays.

In the unlikely event of defect occurring, please follow the Helpline's instructions for replacement or repair.

Outside of the 12 month guarantee period:

If your product needs repair after the guarantee period has ended, the repair must meet the approval requirements for connection to the telephone network. We suggest that you call our recommended repair agent on **08702 405029**.

Additional/Replacement Items

For a full range of items, including additional handsets on either the BT Diverse 6000 ranges or BT Freestyle 2000, 4000 and 7000, please call **0870 240 3962**.

Technical information

How many telephones can you have?

All items of equipment have a Ringer Equivalence Number (REN) which is used to calculate the number of items that may be connected to any one telephone line.

The BT Diverse 6410 has a total REN of 1, i.e. for a base and up to 6 handsets.

Any other instrument provided by BT may be assumed to have a REN of 1 unless stated otherwise.

A total REN of 4 is allowed per telephone line. (For example, if the BT Diverse 6410 is used in conjunction with three extension telephones, each with a REN of 1, then the total = 4.)

R&TTE

This product is intended for use within the UK for connection to the public telephone network and compatible switchboards.

This equipment complies with the essential requirements for the Radio Equipment and Telecommunications Terminal Equipment Directive (1999/5/EC). In demonstration with the Essential Requirement for efficient use of the radio spectrum, the product complies with EN301 406. For a copy of the Declaration of Conformity please contact the BT Diverse Helpline on **0870 240 3962** or email bt.helpdesk@vtecheurope.com
