**MCM AUDIO SELECT™ Black Poly Cone Woofers**

Value-packed, rugged design and affordable pricing makes these woofers the perfect replacement, upgrade or manufacturing components in today's audio market. Carefully

matched cone, magnet weight, voice coil and foam surround offer outstanding characteristics generally found on more expensive drivers.

Order #	Speaker Size	RMS Watts	Peak Watts	Frequency Response	Imp/ohm	SPL (dB)	Voice Coil	Measurements (Inches)			Magnet Wt. (oz.)	Qts.	Vas (cu. ft.)	fs (Hz)

**MCM AUDIO SELECT™ Rubber Surround Poly Woofer**

Perfect for home audio system upgrade and manufacturing. Their unique rubber surround promotes tight, punchy low frequencies that are great for band pass and closed box

enclosure. These woofers replace many of today's name brand drivers. The #55-1215 and 55-1220 have vented pole pieces to cool voice coils and extend their power handling capabilities.

Order #	Speaker Size	RMS Watts	Peak Watts	Frequency Response	Imp/ohm	SPL (dB)	Voice Coil	Measurements (Inches)			Magnet Wt. (oz.)	Qts.	Vas (cu. ft.)	fs (Hz)
								(A)	(B)	(C)

**MCM AUDIO SELECT™ Poly Treated Paper Cone Woofers**

MCM has taken many of the latest speaker technology advancements and created the new line of poly treated paper cone woofers. They have a smooth, rich frequency response and still have the ability to produce instantaneous bass blasts with untainted accuracy. Ridged polypropylene treated paper cone insures low distortion due to cone flexing and helps protect

paper cone from moisture. Venting of the pole piece helps to cool the voice coil and increases power handling. #55-1200, 4 1/2" midrange/woofer has a super thin C-Lite surround increasing its frequency range while the other sizes have rubber surrounds offering deeper, low end frequency response.
