

REF200

## DUAL CURRENT SOURCE/CURRENT SINK

### FEATURES

- COMPLETELY FLOATING:  
No Power Supply or Ground Connections
- HIGH ACCURACY:  $100\mu\text{A} \pm 0.5\%$
- LOW TEMPERATURE COEFFICIENT:  
 $\pm 25\text{ppm}/^\circ\text{C}$
- WIDE VOLTAGE COMPLIANCE:  
2.5V to 40V
- ALSO INCLUDES CURRENT MIRROR

### APPLICATIONS

- SENSOR EXCITATION
- BIASING CIRCUITRY
- OFFSETTING CURRENT LOOPS
- LOW VOLTAGE REFERENCES
- CHARGE-PUMP CIRCUITRY
- HYBRID MICROCIRCUITS

### DESCRIPTION

The REF200 combines three circuit building-blocks on a single monolithic chip—two  $100\mu\text{A}$  current sources and a current mirror. The sections are dielectrically isolated, making them completely independent. Also, since the current sources are two-terminal devices, they can be used equally well as current sinks. The performance of each section is individually measured and laser-trimmed to achieve high accuracy at low cost.

The sections can be pin-strapped for currents of  $50\mu\text{A}$ ,  $100\mu\text{A}$ ,  $200\mu\text{A}$ ,  $300\mu\text{A}$  or  $400\mu\text{A}$ . External circuitry can be used to obtain virtually any current. These and many other circuit techniques are shown in the Applications section of this Data Sheet.

The REF200 is available in plastic 8-pin mini-DIP and SOIC packages.

# SPECIFICATIONS

## ELECTRICAL

At  $T_A = +25^\circ\text{C}$ ,  $V_S = 15\text{V}$ , unless otherwise noted.

PARAMETER	CONDITION	REF200AP, AU			UNITS
		MIN	TYP	MAX	
<b>CURRENT SOURCES</b>					
Current Accuracy			$\pm 0.25$	$\pm 1$	%
Current Match			$\pm 0.25$	$\pm 1$	%
Temperature Drift	Specified Temp Range		25		ppm/ $^\circ\text{C}$
Output Impedance	2.5V to 40V	20	100		M $\Omega$
	3.5V to 30V	200	500		M $\Omega$
Noise	BW = 0.1Hz to 10Hz		1		nAp-p
	f = 10kHz		20		pA/ $\sqrt{\text{Hz}}$
Voltage Compliance (1%)	$T_{\text{MIN}}$ to $T_{\text{MAX}}$		See Curves		
Capacitance			10		pF
<b>CURRENT MIRROR</b>					
Gain	I = 100 $\mu\text{A}$ Unless Otherwise Noted	0.995	1	1.005	
Temperature Drift			25		ppm/ $^\circ\text{C}$
Impedance (output)	2V to 40V	40	100		M $\Omega$
Nonlinearity	I = 0 $\mu\text{A}$ to 250 $\mu\text{A}$		0.05		%
Input Voltage			1.4		V
Output Compliance Voltage			See Curves		
Frequency Response (-3dB)	Transfer		5		MHz
<b>TEMPERATURE RANGE</b>					
Specification		-25		+85	$^\circ\text{C}$
Operating		-40		+85	$^\circ\text{C}$
Storage		-40		+125	$^\circ\text{C}$

## PIN CONFIGURATION

## ABSOLUTE MAXIMUM RATINGS

Applied Voltage .....	-6V to +40V
Reverse Current .....	-350 $\mu\text{A}$
Voltage Between Any Two Sections .....	$\pm 80\text{V}$
Operating Temperature .....	-40 $^\circ\text{C}$ to +85 $^\circ\text{C}$
Storage Temperature .....	-40 $^\circ\text{C}$ to +125 $^\circ\text{C}$
Lead Temperature (soldering, 10s) .....	+300 $^\circ\text{C}$
(SOIC 3s) .....	+260 $^\circ\text{C}$

## PACKAGE/ORDERING INFORMATION

PRODUCT	PACKAGE	PACKAGE DRAWING NUMBER <sup>(1)</sup>	TEMPERATURE RANGE
REF200AP	8-Pin Plastic DIP	006	-25 $^\circ\text{C}$ to +85 $^\circ\text{C}$
REF200AU	8-Pin SOIC	182	-25 $^\circ\text{C}$ to +85 $^\circ\text{C}$

NOTE: (1) For detailed drawing and dimension table, please see end of data sheet, or Appendix C of Burr-Brown IC Data Book. (2) Grade designation "A" may not be marked. Absence of grade designation indicates A grade.

## ELECTROSTATIC DISCHARGE SENSITIVITY

This integrated circuit can be damaged by ESD. Burr-Brown recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

The information provided herein is believed to be reliable; however, BURR-BROWN assumes no responsibility for inaccuracies or omissions. BURR-BROWN assumes no responsibility for the use of this information, and all use of such information shall be entirely at the user's own risk. Prices and specifications are subject to change without notice. No patent rights or licenses to any of the circuits described herein are implied or granted to any third party. BURR-BROWN does not authorize or warrant any BURR-BROWN product for use in life support devices and/or systems.

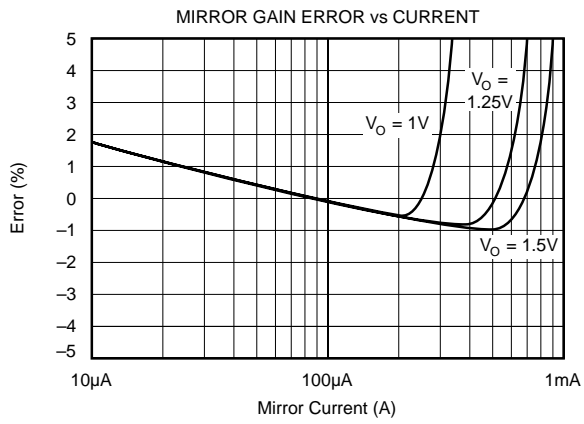

# TYPICAL PERFORMANCE CURVES

At  $T_A = +25^\circ\text{C}$ ,  $V_S = +15\text{V}$ , unless otherwise noted.

# TYPICAL PERFORMANCE CURVES (CONT)

At  $T_A = +25^\circ\text{C}$ ,  $V_S = +15\text{V}$ , unless otherwise noted.

## APPLICATIONS INFORMATION

The three circuit sections of the REF200 are electrically isolated from one another using a dielectrically isolated fabrication process. A substrate connection is provided (pin 6), which is isolated from all circuitry. This pin should be connected to a defined circuit potential to assure rated DC performance. The preferred connection is to the most negative constant potential in your system. In most analog systems this would be  $-V_s$ . For best AC performance, leave pin 6 open and leave unused sections unconnected.

Drift performance is specified by the “box method,” as illustrated in the Current vs Temperature plot of the typical performance curves. The upper and lower current extremes measured over temperature define the top and bottom of the box. The sides are determined by the specified temperature range of the device. The drift of the unit is the slope of the diagonal—typically 25ppm/°C from  $-25^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ .

If the current sources are subjected to reverse voltage, a protection diode may be required. A reverse voltage circuit model of the REF200 is shown in the Reverse Current vs Reverse Voltage curve. If reverse voltage is limited to less than 6V or reverse current is limited to less than  $350\mu\text{A}$ , no protection circuitry is required. A parallel diode (Figure 2a) will protect the device by limiting the reverse voltage across the current source to approximately 0.7V. In some applications, a series diode may be preferable (Figure 2b) because it allows no reverse current. This will, however, reduce the compliance voltage range by one diode drop.

Applications for the REF200 are limitless. Application Bulletin AB-165 shows additional REF200 circuits as well as other related current source techniques. A collection of circuits is shown to illustrate some techniques. Also, see AB-165A.

## PACKAGING INFORMATION

ORDERABLE DEVICE	STATUS(1)	PACKAGE TYPE	PACKAGE DRAWING	PINS	PACKAGE QTY
REF200AP	OBSOLETE	PDIP	P	8	
REF200AU	ACTIVE	SOIC	D	8	100
REF200AU/2K5	ACTIVE	SOIC	D	8	2500

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
